The target group for this article translation are English-speaking readers residing in Germany.

=====

TUDOR GOLD IS A RARE M&A GOLD ACQUISITION-TARGET FOR ANY OF THE MID-TIER AND LARGE CAP GOLD PRODUCERS!

How many tens of million ounces of gold will be found on this 17,913 hectare project in Canada's Golden Triangle?

+++

Treaty Creek Project: The 17,913 hectare concession area is right in the heart of the Golden Triangle

+++

There are at several high potential exploration targets on the property: e.g. Goldstorm and Perfectstorm

+++

Treaty Creek is currently the hottest project in British Columbia – there maybe **10, 20, 30 or even 60 million ounces of gold in the ground?!**

+++

At Seabridge Gold's directly adjacent KSM project a few kilometres away, more than **100 million ounces of gold have been delineated in all resource categories so far.**

+++

Take advantage of the current consolidation in gold and this world-class explorer for a strategic investment!

+++

Steady news flow expected over the next few months: Various results from the ongoing drilling program and the publishing of a maiden resource estimate should put this premium developer on the **buying radar of all TOP 25 gold producers! It is still not too late to get positioned in the company!**

Dear Readers,

we all know the saying **"a picture is worth a thousand words"**. This metaphor stands for the added value of images over text alone. It refers to the fact that complicated facts can often be explained very simply with a picture or a representation and a picture usually has a stronger impression on the viewer than a long text.

The extremely bullish technical picture of **gold and selected gold stocks** can be seen particularly clearly by viewing a chart (see below). We strongly believe, the gold sector has been in a **cyclical upward trend** (secular bull market) for several years, which is characterized often by brief, intermittent price setbacks (consolidations).

And after these consolidations, bullish outbreaks often lead to rapid rallies of 20-30% in gold or several hundred percent in top gold stocks such as **Tudor Gold Corp.** (WKN: A2AJ7Y, Frankfurt: TUC / TSXV: TUD).

The healthy price consolidation in gold is over - the current breakout should led gold towards USD 2,150 / 2,200!

Source: Stockcharts.com

In this environment, Tudor Gold shares could quickly reach the next chart price levels of CAD \$ 4.00 / 4.50 and then at CAD \$ 5.00 / 5.50!

We have already explained in more detail in previous articles that shares of **Tudor Gold** have one of the greatest gold leverages (2019: 12.6) vs. the gold price in the precious metals sector!

This year the leverage was meanwhile at 15.2 - that means in time of a gold price increase of 1%, the share price of Tudor Gold could even gain up to 15.2%. You normally get such leverages only in the options market, where you fight time time decay.

Historic leverage of the Tudor Gold stock over the Gold price (spot)					
Year 2020			Year 2019		
Tudor Gold Corp.			Tudor Gold Corp.		
Stock price as of 02.01.20	0,76 CAD	%:	Stock price as of 02.01.19	0,24 CAD	%:
Stock price as of 30.09.20	3,45 CAD	353,9	Stock price as of 31.12.19	0,79 CAD	229,2
Leverage in 2020:	15,2		Leverage in 2019:	12,6	
Goldpreis (1 ounce):			Goldpreis (1 ounce):		
Price as of 02.01.20	1.529 USD	%:	Price as of 02.01.19	1.284 USD	%:
Price as of 30.09.20	1.886 USD	23,3	Price as of 31.12.19	1.517 USD	18,1
Hypothetical gold price increase from actual 1950 USD to :			Simulated, hypothetical target share price of Tudor Gold (assumed leverage of 8), actual stock price CAD 3.07		
		in %:			in %:
2.200 USD		12,82	6,22 CAD		102,6
2.500 USD		28,2	10,00 CAD		225,6
2.800 USD		43,6	13,78 CAD		348,7
3.200 USD		64,1	18,81 CAD		512,8
4.000 USD		105,1	28,89 CAD		841,0
Source: Yahoo Finance, JS Research UG / All data and information without guarantee /					
Past performance is no guarantee of future results					

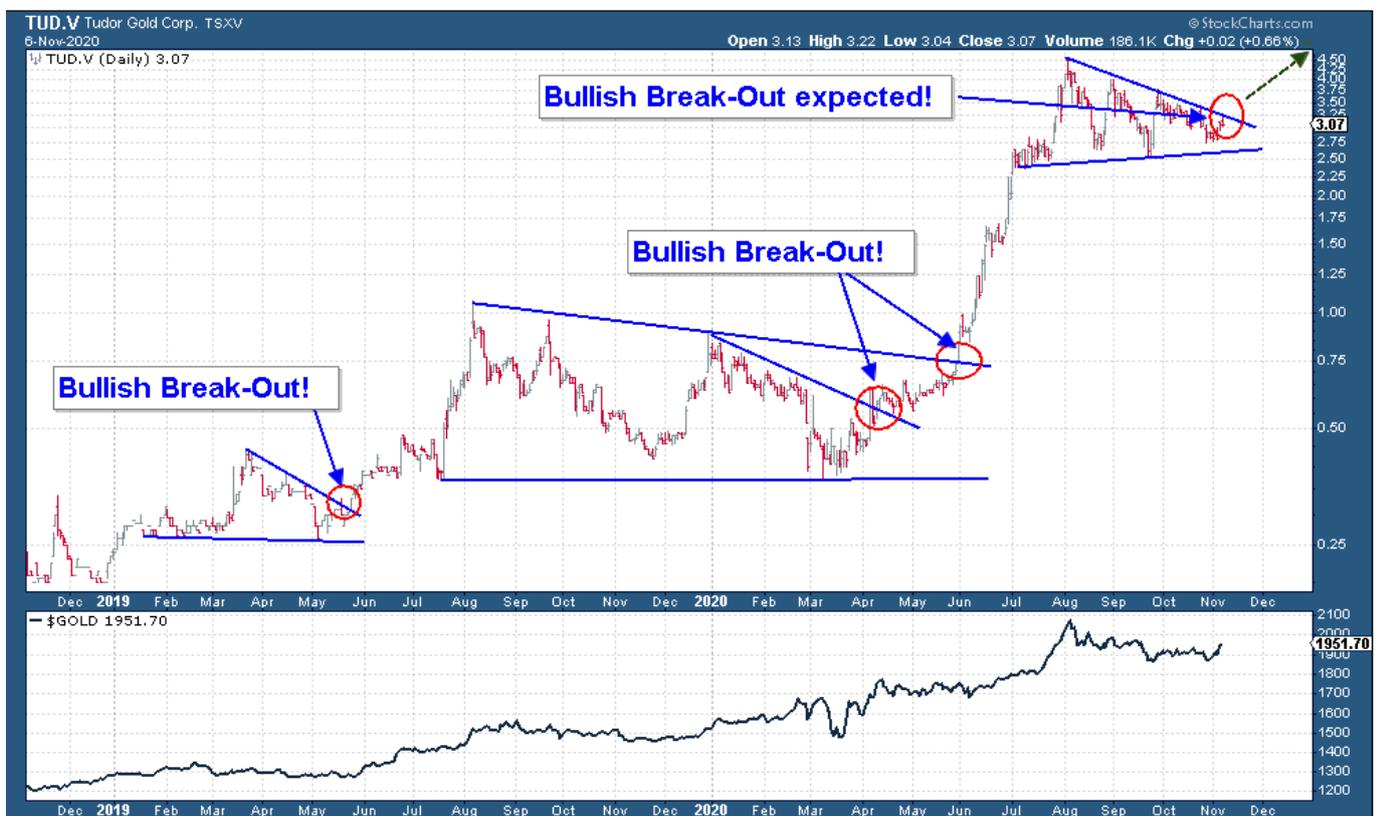

Based on a conservative leverage of 8, we made simulations where the Tudor Gold share price could be headed, if the price for one ounce of gold rises towards USD 2,200 in the next few weeks or months:

We came up to a hypothetical price target of **CAD 6.22 (102.6% price gain)** for the Tudor Gold stock.

And strong fundamental arguments underpin this massive chart-technical upward trend in the gold price:

- The devaluation race of fiat currencies in order to stimulate national exports;
- Global expansion of central bank balance sheets and the trend towards re-inflation erode the monetary value. Gold is the ideal hedging instrument here;
- Gold has proven its tradition and track record for several thousand years as a globally recognized medium of exchange and a store of value;
- Gold can be used as a portfolio diversification asset;

A downright explosive technical situation is looming here - during the last bullish outbreaks, shares of Tudor Gold have risen quickly 100-200%!

Quelle: Stockcharts.com

With an investment in Tudor Gold you are betting on a unique gold story and have the best chance of achieving a significant outperformance compared to the gold price!

Smart investors and traders often execute an good tradeplan: In **bull markets**, they often buy dips (at corrections) – and therefore building up positions in strong stocks.

In **bear markets**, they typically sell positions into strength (which means, the reduce positions).

Precious metals and selected companies from the sector are within a strong bull market right now!

We are thrilled about the extremely successful 2020 exploration program from Tudor Gold (WKN: A2AJ7Y, Frankfurt: TUC / TSXV: TUD) so far !!!

TUDOR GOLD

The world-class explorer and project developer has already announced some absolutely spectacular results in the last few months: e.g.

1. Drill hole GS-20-65: 1.161 g/t Gold Eq over 930 meters including 2.12 g/t Gold Eq over 348 meters;
2. Drill hole GS-20-75: 0.741 g/t AuEq over 1152 meters including 1.561 g/t AuEq over 121.5 meters;
3. Drill hole GS-20-73: 775.5 meters averaging 0.932 g/t Au Eq including an interval of 1.506 g/t Au Eq over 229.5 meters;
4. Drill hole GS-20-68: 793.15 meters averaging 0.561 g/t Au Eq;
5. New Major Discovery at the “Perfectstorm” drilling target: Tudor Gold discovered an additional gold-bearing mineralization structure on the Treaty Creek project called “Perfectstorm PSZ”!

The results of the first three drill holes on "Perfectstorm PSZ" are really impressive and a good start for additional step-out drill in the future:

1. PS-20-01: 133.5 meters averaging 0.594 g/t Au Eq.
2. PS-20-02: 151 meters averaging 0.621 g/t Au Eq.
3. PS-20-03: 220.5 meters averaging 0.402 g/t Au Eq.

The second largest shareholder after the founder and CEO of Tudor Gold, **Walter Storm**, is the highly successful and legendary mining investor **Eric Sprott**. In the "Sprott Money News Weekly Wrap-up" show, which appears regularly on Fridays, he regularly speaks about trends, his observations and news from the precious metals sector and companies in which he has invested or has on his watch list.

Eric has spoken a number of times about his **strategic investment in Tudor Gold**. So recording from September 25, 2020 ([link here](#)).

Source: Youtube, Interview as of September 25, 2020 /

Quote from the interview with Eric Sprott on September 25th, 2020:

„Ken is a wonderful geologist... and he's the guy that has the feet on the ground and he's a very good spokesperson for that deposit. I know that there's a belief that this could be one of the biggest deposits in the Americas and i certainly concur with that if you look at the size of the deposit, the depth of the holes. I

think they had one that went down to 1,140 meters oh my god...that's incredibly large, so I am pretty certain, we're going to be hitting **multiples of tens of millions of ounces** there.”

As a side note: Tudor Gold attended the virtual Beaver Creek Precious Metals Summit in September and gave a powerful presentation. We are sure that the market participants have not yet fully realized the full extent and potential of the Treaty Creek project as of yet!

Tudor Gold has several extremely promising drill targets on the project. 'Goldstorm' alone has a conceptual exploration target of at least 1 billion tons of rock, which, depending on the average grade of ore, could mean potentially **20-35 million ounces of gold**. And the gold mineralization begins near the surface, which supports the case for a future “super open pit”.

The most important thing: The Treaty Creek project can be connected to the existing infrastructure in the region with little (cost) effort. The next highway is only about 20 kilometres away. There is no need to build an expensive and complex tunnel to connect the deposit to an infrastructure.

Please take a look at the presentation from Ken Konkin, P.Geo., Vice President for Project Development at Tudor Gold: ([Link here](#))

[Source: Tudor Gold Corp.](#)

This year's exploration program of Tudor Gold includes 40,000 meters of drilling - we expect a steady flow of news over the next few months.

[Source: Tudor Gold Corp.](#)

Market watchers expect Tudor Gold will announce the largest gold deposit discovery in North and South America over the past 10 years will be found on Treaty Creek!

We are sure: Canadian exploration history will be written in this camp /on this property!

[Source: Tudor Gold Corp.](#)

Tudor Gold is your winning lottery ticket in this dynamic precious metal bull market and a first-class M&A takeover target by larger gold producers!

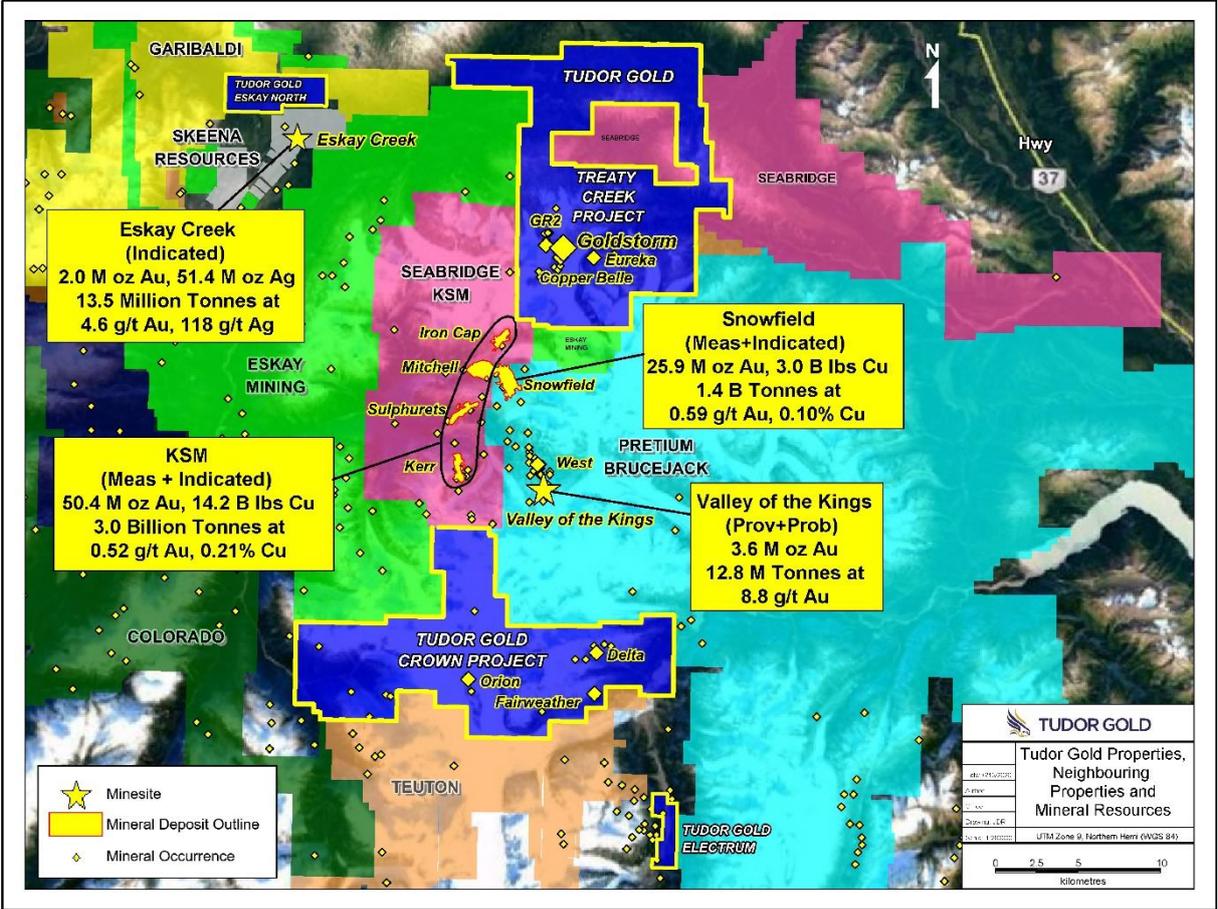

Don't miss the opportunity.

For all new readers, we have briefly put together some background information on Tudor Gold:

Tudor Gold is a precious and base metal exploration company with properties in the 'Golden Triangle' of British Columbia, an area of producing or past producing mines and several large deposits near potential development. The 17,913 hectare Treaty Creek project (in which Tudor Gold has a 60% interest) is bordered to the southwest by Seabridge Gold Inc.'s KSM property and to the southeast by Pretium Resources Inc.'s Brucejack property. The company controls 100% of the 'Electrum' project. In addition, Tudor has 'earn-in' options and is 100% involved in other projects in the 'Golden Triangle'.

From the southwest corner of the Treaty Creek claims bordering Seabridge Gold's concession areas, the Sulfurets Thrust Fault leads from the Seabridge Iron Cap deposit to the Tudor Gold Goldstorm system. The 'Goldstorm' zone is located five kilometers northeast of Seabridge's 'Iron Cap' deposit.

The "Golden Triangle" region is one of the productive gold regions in Canada - over 145 million ounces of gold and over 50 billion pounds of copper have already been found in the immediate vicinity by the world-class explorer Tudor Gold!

Source: Tudor Gold Corp.

Top Facts & Highlights about Tudor Gold Corp:

- ✓ **Prime location:** Huge land package in the famous Canadian 'Golden Triangle' region - **more than 145 million ounces of gold and 50 billion Pounds of copper have already been discovered within a few kilometers to Treaty Creek.**
- ✓ The flagship project 'Treaty Creek' is right next to the largest world-class deposits and mines. (Seabridge Gold and Pretium Resources)
- ✓ Extremely promising project portfolio with over **35,518 hectares** of concession areas, spread over four projects.
- ✓ Treaty Creek' is close to good infrastructure: **the nearest road and power line are only around 20 km away.**
- ✓ There is running water all year round on Treaty Creek - this is an important requirement for future mining operations.
- ✓ Excellent geological location of the acquired land packages in mining-friendly British Columbia, Canada.
- ✓ **Top Management** - Very experienced and successful team under the leadership of the renowned **Walter Storm**, co-founder of the Canadian mining company **Osisko Mining**. **Ken Konkin**, a multi award-winning geologist, has led the drilling program since 2019. He was instrumental in the discovery of Pretium Resources 'The Valley of Kings' deposit.

- ✓ **World-class drill results at flaggship project ,Treaty Creek': e.g.**
 - **Drill hole GS-20-65: 1.161 g/t AuEq over 930 meters including 2.12 g/t AuEq over 348 meters;**
 - **Drill hole GS-20-75: 0.741 g/t AuEq over 1152 meters including 1.561 g/t AuEq over 121.5 meters;**
 - **Drill hole GS-20-57: 0.845 g/t AuEq over 973 meters including 1.40 g/t AuEq over 217.5 meters;**
 - **Drill hole GS-20-64: 0.983 g/t AuEq over 550.55 meters including 1.482 g/t Au Eq over 154.5 meters;**
 - **Drill hole GS-20-73: 0.932 g/t AuEq over 775.5 meters including 1.502 g/t Au Eq over 229.5 metres;**
 - **Drill hole GS-20-68: 0.561 g/t AuEq over 793.15 meters;**
 - **Drill hole GS-19-42: 0.849 g/t AuEq über 780 meters including 1.275 g/t Gold Eq over 370.5 meters within the 300 horizon zone;**
 - **Drill hole GS-19-47: 0.697 g/t AuEq over 1,081.5 meters including 0.867 g/t AuEq over 301.5 meters within the 300 horizon zone;**
 - **Drill hole GS-19-52: 0.783 g/t AuEq over 601.5 meters including 1.062 g/t Au over 336.0 meters in the the 300 horizon zone;**
 - **Drill hole GS-19-48: 0.793 g/t AuEq over 927.0 meters;**
 - **Drill hole GS-19-49: 0.800 g/t AuEq over 826.5 meters including 1.080 g/t Au over 249 meters;**

- ✓ **Enormous exploration potential** – most parts of the exploration projects are still largely unexplored. There are several **high potential exploration targets on Treaty Creek** (Goldstorm, Copper Belle, Perfectstorm, Eureka and Orpiment).
- ✓ Tudor Gold's concession areas have the potential to be in the **two-digit millions of ounces of gold area**.
- ✓ Tudor Gold is a prime M&A acquisition target.
- ✓ **Strong support for the 'Tahltan First Nation'**: Signing of a commitment and communication agreement.
- ✓ **Clear vote of confidence** - as of October 23, 2020, close to 50% of the shares were in the hands of CEO and company founder **Walter Storm** (31.8%) and commodity star investor **Eric Sprott** (18.1%).

The stock is on the buying radar of countless gold investors - everyone is waiting for more news flow from the 2020 drilling season in the next few weeks and months!

The company plans to publish an initial NI-43-101 resource in the coming months.
