The countdown has begun for the publishing of the maiden gold resource estimate...

The share price is already up 56% within 4 weeks!

The release of the first NI-43 101 resource for the 'Goldstorm' zone should be imminent! We expect at least 15 million ounces of gold! A revaluation of the company is in progress! Don't miss this opportunity!

Dear readers,

the gold price is trading sideways for some time now- we see it as a consolidation on a high level. But that is the famous calm before the storm, since fundamentally everything speaks in favor of rising gold prices. The central banks are continuing their expansionary monetary policy and the governments are launching economic stimulus programs to minimize the collateral damage caused by COVID 19 as much as possible.

But there is one company from the gold sector universe of around 2,000 shares, whose price performance, despite the consolidation in the gold price, has so far stood out this year and has already increased by an incredible 56%!

And that in the last four weeks alone! We're talking about the world-class exploration and project development company Tudor Gold Corp.

TUDOR GOLD

(ISIN: CA89901P1071, TSX-V: TUD, Frankfurt: TUC,)

We have already written about this company several times in the past. As you know, **Tudor Gold** is working at the moment with full speed on their **maiden resource estimate** for the Goldstorm Zone on the flagship Treaty Creek project in the Canadian province of British Columbia.

After this world-class explorer announced the last set of outstanding drill results of the 2020 record drilling season (over 45,600 meters) on January 7th of this year, it looks like the release of the resource estimation is getting closer now. It seems, that smart investors are already positioning themselves, the significant share price increase might be an indication for this.

We can very well imagine that the company could define at least 15 million ounces of gold, perhaps significantly more, on the Treaty Creek project!

In this case, the in-situ value would be 27 billion USD (@ 1,800 USD per ounce)!

It will be exciting: We can very well imagine that Tudor Gold will soon let the “cat out of the bag” and announce the maiden resource **within the next few weeks.**

Potential Gold Resource ounces:	1.800 USD	2.000 USD	2.500 USD	3.000 USD	5.000 USD

Even taking into account the trading volume, it smells suspiciously as if, in addition to the smart investors, 'big boys' are already stocking up position on the stock!

After the strong chart breakout, the stock should quickly hit the all-time highs at CAD \$ 4.50!

In a brand-new news release ([link here](#)) this week, the company announced that **Ken Konkin** has been appointed to its board of directors. His title was also expanded to: "Vice President Exploration and Project Development".

Congratulations to his sensational exploration success at Treaty Creek and to the promotion to the Board of Directors!

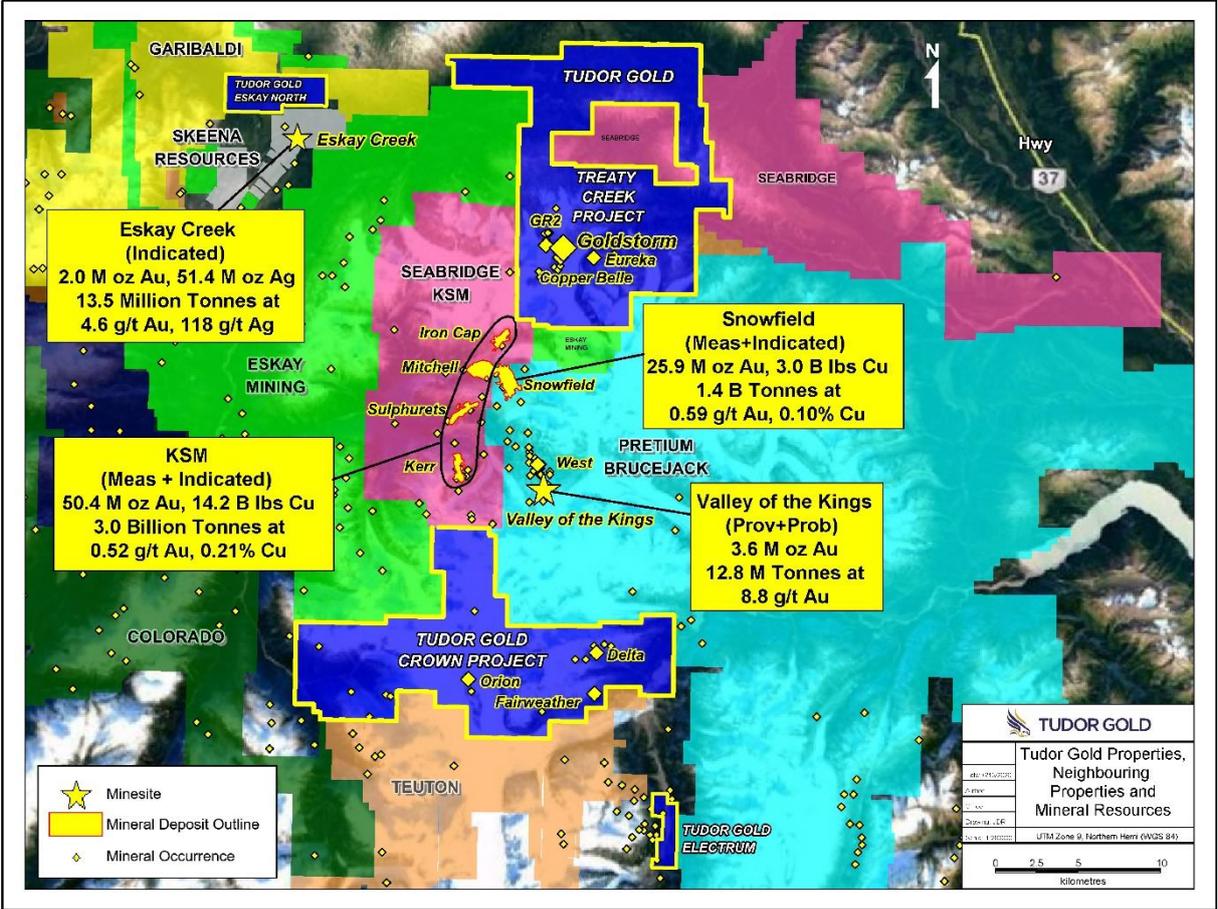

Ken Konkin,

For all new readers, we have briefly put together some background information on Tudor Gold:

Tudor Gold is a precious and base metal exploration company with properties in the 'Golden Triangle' of British Columbia, an area of producing or past producing mines and several large deposits near potential development. The 17,913 hectare Treaty Creek project (in which Tudor Gold has a 60% interest) is bordered to the southwest by Seabridge Gold Inc.'s KSM property and to the southeast by Pretium Resources Inc.'s Brucejack property. The company controls 100% of the 'Electrum' project. In addition, Tudor has 'earn-in' options and is 100% involved in other projects in the 'Golden Triangle'.

From the southwest corner of the Treaty Creek claims bordering Seabridge Gold's concession areas, the Sulfurets Thrust Fault leads from the Seabridge Iron Cap deposit to the Tudor Gold Goldstorm system. The 'Goldstorm' zone is located five kilometers northeast of Seabridge's 'Iron Cap' deposit.

The "Golden Triangle" region is one of the productive gold regions in Canada - over 145 million ounces of gold and over 50 billion pounds of copper have already been found in the immediate vicinity by the world-class explorer Tudor Gold!

No guarantee or liability is expressly assumed that the price or profit development forecasts by JS Research UG (limited liability) will materialize.

Information on conflicts of interest: The editors and responsible authors hereby declare that the following conflicts of interest with regard to the Tudor Gold company discussed in this publication exist at the time of publication: I. At the time of publication, the authors hold shares in Tudor Gold and reserve the right to retain them sell or take new positions in Tudor Gold at any time and without notice. The authors and the publisher cannot rule out that other stock market letters, media or research firms may discuss Tudor Gold shares during the same period. Therefore, symmetrical generation of information and opinions can occur during this period. This publication by JS Research UG (limited liability) is expressly not a financial analysis, but a publication of a very clear and clearly promotional character and thus to be understood as an advertising / marketing message. According to §34 WpHG I would like to point out that the author, editors, clients or brokers hold shares, options or warrants at the time of

publication and can increase or sell these positions at any time! This clearly and specifically creates a conflict of interest.

We expressly point out a conflict of interest. This also applies to options and derivatives based on these securities. Any resulting transactions may, under certain circumstances, affect the company's share price. The information, recommendations, interviews and company presentations published on the "websites", the newsletter or the research reports are usually paid for by the respective companies or third parties (so-called "third parties"). The "third parties" include, for example, investor relations and public relations companies, brokers or investors. JS Research UG (limited liability) or its employees can partially be compensated directly or indirectly for the preparation, electronic distribution and other services by the discussed companies or so-called "third parties" with an expense allowance. Even if we prepare each report to the best of our knowledge and belief, we advise you to consult other external sources, such as your house bank or a trusted investment advisor, with regard to your investment decisions. For this reason, liability for financial losses that may result from using the information discussed here for one's own investment decisions is categorically excluded. Particularly in the case of commodities and exploration stocks and low capitalized stocks, the portfolio proportions of individual shares should only be so much that even in the event of a total loss, the total portfolio value can only lose marginal value. In particular, stocks with a low market capitalization (so-called "small caps") and especially exploration stocks as well as all listed securities in general are subject to considerable price volatility. The liquidity in the securities can be correspondingly low. When investing in the commodity sector (exploration companies, raw material producers, companies developing raw material projects), additional risks must be taken into account. Below are some examples of specific risks in the commodity sector: Country risks, currency fluctuations, natural disasters and storms (e.g. floods, storms), changes in the legal situation (e.g. export and import bans, punitive tariffs, prohibition of raw material extraction or raw material exploration, nationalization of projects), environmental requirements (e.g. higher costs for environmental protection, designation of new environmental protection areas, prohibition of various mining methods), fluctuations in raw material prices and considerable exploration risks.
