**Superior Gold-Discovery!**

**Phenomenal Drilling Success: Newly discovered zone of mineralization indicates another huge gold system! Buy alert!**

**+++ Sensational Discovery: New gold system found +++**

**+++ Will the company discover 10-30 million ounces of gold at the „Perfectstorm PSZ“ target in addition to the rapid growing Goldstorm-system? +++**

**+++ No major gold producer or investor could ignore Tudor Gold any longer +++**

**+++ You can place your bet now on this takeover candidate! +++**

**Tudor Gold (WKN: A2AJ7Y, Frankfurt: TUC / TSXV: TUD) published yesterday a sensational news release, which should lead to an immediate re-evaluation!**

**TUDOR GOLD**

+++

**The world-class explorer announced further spectacular results from the drill season this year on Treaty Creek in B.C., Canada:**

- **Drill hole GS-20-73 intercepted 775.5 meters averaging 0.932 g/t Au Eq. including an intercept with 1.506 g/t Au Eq over 229.5 meters;**
- **Drill hole GS-20-68 intercepted 793.15 meters averaging 0.561 g/t Au Eq;**
- **Drill hole GS-20-72 intercepted 726 meters averaging 0.507 g/t Au Eq**

+++

**New Major Discovery: Tudor Gold discovers another gold bearing mineralization structure on the Treaty Creek Project called "Perfectstorm PSZ"! Can we expect a 10-30 million ounce gold treasure?**

**Three drills = three hits! The results of the first three drill holes from "Perfectstorm PSZ" are really impressive:**

- **Drill hole PS-20-01: 133.5 meters averaging 0.594 g/t Au Eq.**
- **Drill hole PS-20-02: 151.0 meters averaging 0.621 g/t Au Eq.**
- **Drill hole PS-20-03: 220.5 meters averaging 0.402 g/t Au Eq.**

+++

Dear readers,

on July 27th, Tudor Gold announced the latest exploration results from its extensive 2020 drill program. Since then, shareholders and market participants have been waiting eagerly for news updates.

**After so much waiting, finally we got there:** As expected, Tudor Gold (WKN: A2AJ7Y, Frankfurt: TUC / TSXV: TUD) delivered series of super strong news in the latest press release ([link here](#)). Here is a summary with our commentary:

1. Discovery Hole on a new drill target called "Perfectstorm PSZ"! Like Goldstorm, this target is also located on the flagship project Treaty Creek. Tudor Gold encounters gold in all three initial drill holes. The third PSZ System drill hole was a 300 meter step-out to the southwest to drill hole 1 and 2. Important: The large identified magnetic anomaly (= exploration target) is at least 1.5 kilometers long and 500 to 800 meters wide. **We therefore see an ENORMOUS EXPLORATION POTENTIAL, which could be in the order of magnitude of the Iron-Cap deposit of Seabridge Gold (33.05 million ounces of gold in all resource categories) only 3 km away!!!**
2. Hole GS-20-73 extends the 300 Horizon Zone averaging 1.506 g/t AuEq over 229.5 meters over an interval of 775.5 meters averaging 0.932 g/t AuEq.
3. Expansion of the mineralization zone at Goldstorm along the northeast axis to 1,100 meters! The zone was previously extended from 850 to 1,000 meters with the step-out drill hole GS-20-64. With the two drill holes, the length of the system increases significantly by 29%. This increases also the conceptual exploration target significantly.
4. The exploration season at Tudor Gold is still running at full speed with 6 active drill rigs. Tudor is one of the very few companies in the "Golden Triangle region" that will deliver continuous newsflow into the winter months. Most companies in the region often only drill until September.

**Let's take a quick look what Ken Konkin, P.Geo., Vice President, Project Development at Tudor Gold, stated in the press release:**

*"We are very pleased to have intersected significant gold-copper-silver porphyry-related mineralization within a large magnetic anomaly called Perfectstorm (PSZ). This magnetic anomaly is located along a relatively evenly spaced frequency of large deposits following the Treaty-Sulphuretes Thrust Fault, approximately mid-way between the Iron Cap Deposit to the southwest and our Goldstorm System to the northeast. Results obtained from PS-20-01 and PS-20-02 on Section 89+00 NE demonstrate the consistency within these two drill holes completed off the same drill pad. PS-20-01 intersected 0.594 gpt AuEq over 133.5 meters while PS-20-02 intersected 151 meters of 0.621 gpt AuEq. The third PSZ System drill hole was a 300 meter step-out to the southwest and this hole (PS-20-03) intersected 220.5 meters of 0.402 gpt AuEq on Section 86+00 NE. The results suggest that the system is open to expansion to the southwest and to the northwest. The exploration target area is at least 1.5 kilometers long and 500-800 meters wide. We are very excited to see the results confirming that*

*large mineralized polymetallic systems occur at a predictable frequency along the Sulphuretes-Treaty Thrust Fault belt. We are planning an aggressive diamond drill-hole program for 2021 to further expand the limits of the PSZ System's potential mineralization, searching for the center of the metal pile as we have successfully done with the Goldstorm System."*

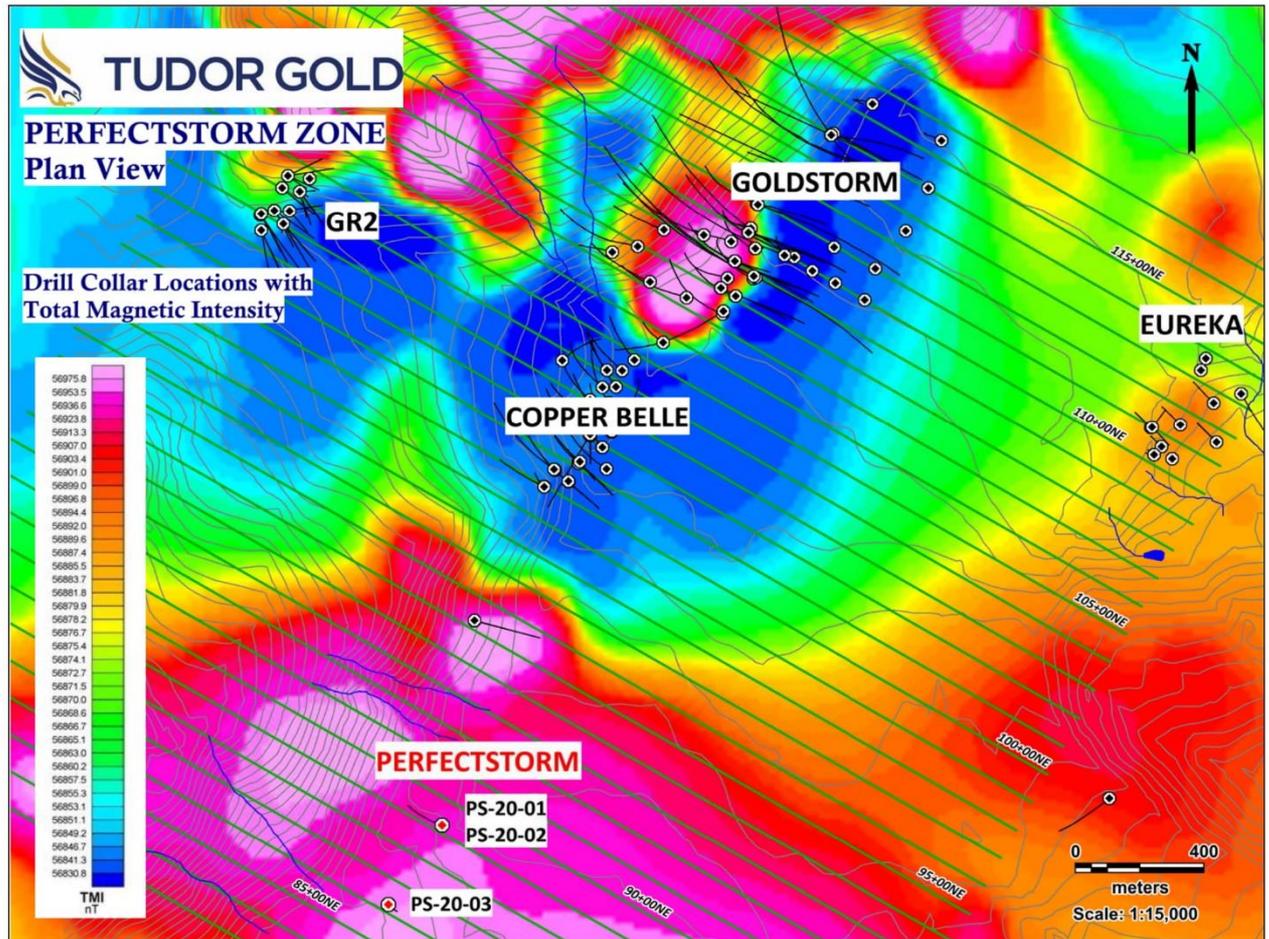

**Walter Storm, President and CEO, stated:**

*"We are delighted to see continued success from the Treaty Creek drill program. Not only are we getting excellent results from all the drill holes completed this year, we have also discovered a new mineralized system at Perfectstorm. This demonstrates the remarkable potential that our flagship property holds. However, we must now focus all our exploration efforts on completing the drilling at Goldstorm. We intend to continue our 150 meter step-outs to the northeast on Section 115+50 NE as well as expand the drilling to the southeast and northwest along Sections 110+00 NE, 111+00 NE, 112+50 NE and 114+00 NE. The Goldstorm System remains open in all directions and at depth."*

**We see ENORMOUS EXPLORATION POTENTIAL at the drill target "Perfectstorm (PSZ)"!**

**A reference of the possible size of the system (= exploration target) can be found when looking to Seabridge Gold's Iron Cap deposit, which is only 3 km away in distance. So far, a total of 33 million ounces of gold have been delineated there in all resource categories ([link here](#))!**

**We expect the drilling season 2021 to be extremely exciting for "Perfectstorm PSZ" / Tudor Gold!**

Source: Tudor Gold Corp.

As already stated in previous articles ([link here](#)), shares of Tudor Gold offer one of the largest gold leverages in the precious metals sector! While investing, you are betting here on a unique exploration story with a great chance to achieve a significant outperformance compared to the gold price!

Tudor Gold has been one of the top performing stocks among the estimated 2,000 - 3,000 listed resource stocks since 2019. After a deep read of the press release, the community will quickly realize the tremendous potential of the new discovery. (the well-positioned team of geologists led by the world-famous and award-winning Ken Konkin has discovered another large gold treasure!)

We conclude, stock price appreciation to levels above **CAD\$ 5, 6 and 7** should be only a matter of time!

**Tudor Gold is your lottery ticket in this dynamic precious metal bull market and a first-class M&A takeover target by larger gold producers!**

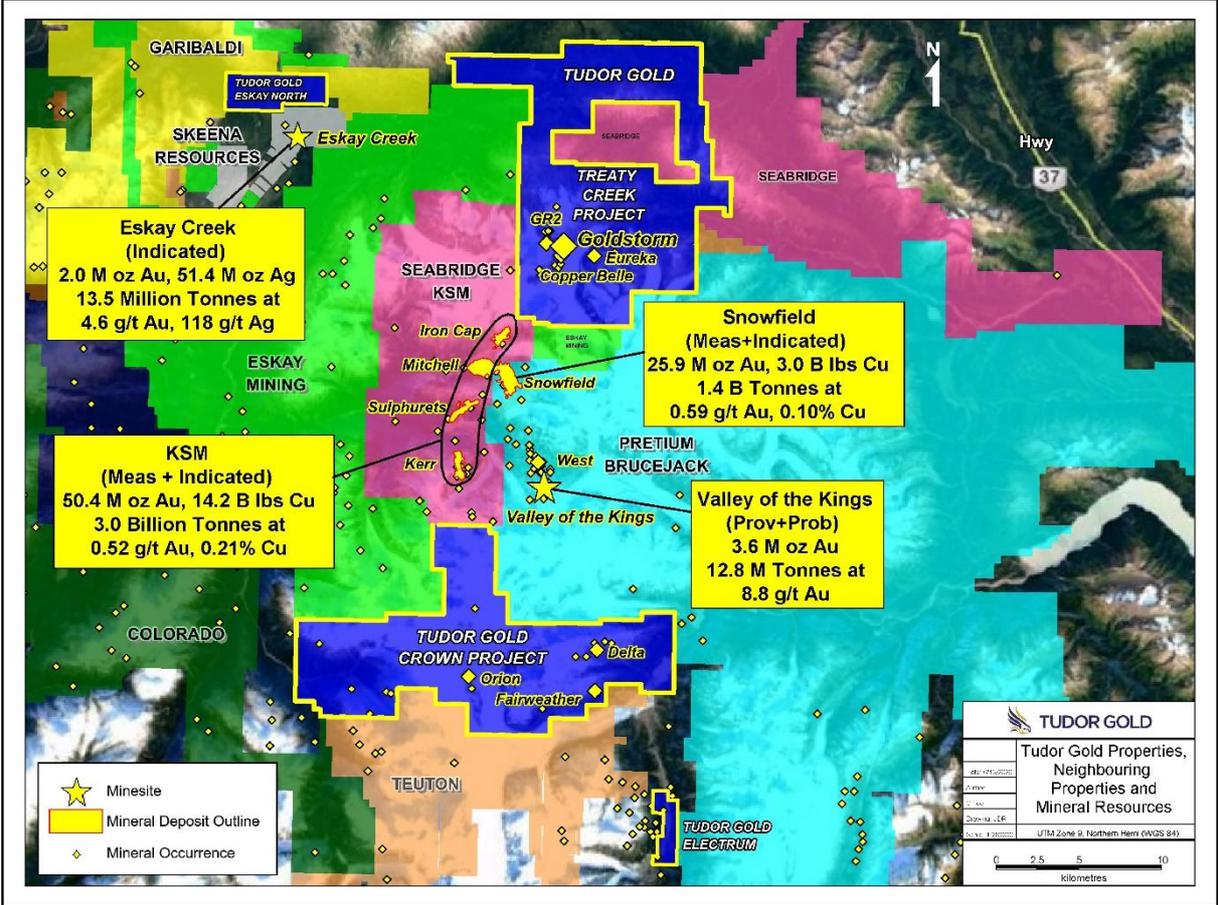

**Don't miss the opportunity.**

**For all new readers, we have briefly put together some background information on Tudor Gold:**

**Tudor Gold** is a precious and base metal exploration company with properties in the 'Golden Triangle' of British Columbia, an area of producing or past producing mines and several large deposits near potential development. The 17,913 hectare Treaty Creek project (in which Tudor Gold has a 60% interest) is bordered to the southwest by Seabridge Gold Inc.'s KSM property and to the southeast by Pretium Resources Inc.'s Brucejack property. The company controls 100% of the 'Electrum' project. In addition, Tudor has 'earn-in' options and is 100% involved in other projects in the 'Golden Triangle'.

From the southwest corner of the Treaty Creek claims bordering Seabridge Gold's concession areas, the Sulfurets Thrust Fault leads from the Seabridge Iron Cap deposit to the Tudor Gold Goldstorm system. **The 'Goldstorm' zone is located five kilometers northeast of Seabridge's 'Iron Cap' deposit.**

The "Golden Triangle" region is one of the productive gold regions in Canada - over 80 million ounces of gold and over 17 billion pounds of copper have already been found in the immediate vicinity by the world-class explorer Tudor Gold!

## **Top Facts & Highlights about Tudor Gold Corp:**

- ✓ **Prime location:** Huge land package in the famous Canadian 'Golden Triangle' region - **more than 80 million ounces of gold have already been discovered within a few kilometers.**
- ✓ The flagship project 'Treaty Creek' is right next to the largest world-class deposits and mines. (Seabridge Gold and Pretium Resources)
- ✓ Extremely promising project portfolio with over **35,518 hectares** of concession areas, spread over four projects.
- ✓ Treaty Creek' is close to good infrastructure: **the nearest road and power line are only around 20 km away.**
- ✓ Excellent geological location of the acquired land packages in mining-friendly British Columbia, Canada.
- ✓ **Top Management** - Very experienced and successful team under the leadership of the renowned **Walter Storm**, co-founder of the Canadian mining company **Osisko Mining**. **Ken Konkin**, a multi award-winning geologist, has led the drilling program since 2019. He was instrumental in the discovery of Pretium Resources 'The Valley of Kings' deposit.
- ✓ **World-class drill results at flagship project ,Treaty Creek': e.g.**
  - Drill hole GS-20-65: 1.161 g/t AuEq over 930 meters including 2.12 g/t AuEq over 348 meters;
  - Drill hole GS-20-57: 0.845 g/t AuEq over 973 meters including 1.40 g/t AuEq over 217.5 meters;
  - Drill hole GS-20-64: 0.983 g/t AuEq over 550.55 meters including 1.482 g/t Au Eq over 154.5 meters;
  - Drill hole GS-20-73: 0.932 g/t AuEq over 775.5 meters including 1.502 g/t Au Eq over 229.5 metres;
  - Drill hole GS-20-68: 0.561 g/t AuEq over 793.15 meters;
  - Drill hole GS-20-72: 0.507 g/t AuEq over 726 meters;
  - Drill hole GS-19-42: 0.849 g/t AuEq über 780 meters including 1.275 g/t Gold Eq over 370.5 meters within the 300 horizon zone;
  - Drill hole GS-19-47: 0.697 g/t AuEq over 1,081.5 meters including 0.867 g/t AuEq over 301.5 meters within the 300 horizon zone;
  - Drill hole GS-19-52: 0.783 g/t AuEq over 601.5 meters including 1.062 g/t Au over 336.0 meters in the the 300 horizon zone;
  - Drill hole GS-19-48: 0.793 g/t AuEq over 927.0 meters;
  - Drill hole GS-19-49: 0.800 g/t AuEq over 826.5 meters including 1.080 g/t Au over 249 meters;
  - Drill hole GS-19-50: 0.681 g/t AuEq over 577.5 meters;
  - Drill hole CB-18-39: 1.086 g/t AuEq over 563.8 meters
- ✓ **Enormous exploration potential** – most parts of the exploration projects are still largely unexplored.

- ✓ Tudor Gold's concession areas have the potential to be in the **two-digit millions of ounces of gold area**.
- ✓ Tudor Gold is a prime M&A acquisition target.
- ✓ **Strong support for the 'Tahltan First Nation'**: Signing of a commitment and communication agreement.
- ✓ **Clear vote of confidence** - as of July 10, 2020, more than 50% of the shares were in the hands of CEO and company founder **Walter Storm** (32.5%) and commodity star investor **Eric Sprott** (19.7%).

The stock is on the buying radar of countless gold investors - everyone is waiting for more news flow from the 2020 drilling season in the next few weeks and months!

The company plans to publish an initial NI-43-101 resource estimate later this year.

Jörg Schulte

Risk information and disclaimer: We expressly point out that we do not accept any liability for the content of external links. Every investment in securities is fraught with risks. Due to political, economic or other changes, there can be considerable price losses. This applies in particular to investments in (foreign) small caps as well as in small and microcap companies; Due to the low market capitalization, investments in such securities are highly speculative and involve an extremely high risk up to the total loss of the invested capital. In addition, some of the stocks presented by JS Research UG (limited liability) are subject to currency risks. The background information, market assessments and securities analyzes published by JS Research UG (limited liability) for the German-speaking area were prepared in compliance with the Austrian and German capital market regulations and are therefore intended exclusively for capital market participants in the Republic of Austria and the Federal Republic of Germany; other foreign capital market regulations were not taken into account and do not

apply in any way. The publications by JS Research UG (limited liability) are for informational purposes only and expressly do not represent a financial analysis, but are promotional texts of a purely advertising nature to the companies discussed in each case, which pay a fee for this. There is no consulting contract between the reader and the authors or the publisher through the purchase of the JS Research UG (limited liability) publications. All information and analyzes do not constitute a solicitation, an offer or a recommendation to buy or sell investment instruments or for other transactions. Every investment in stocks, bonds, options or other financial products is subject to - in some cases considerable - risks. The editors and authors of JS Research UG (limited liability) publications are not professional investment advisors!!! That is why it is essential that you always seek advice from a qualified specialist (e.g. your house bank or a qualified advisor you trust) when making investment decisions. All information and data published by JS Research UG (limited liability) come from sources that we consider to be reliable and trustworthy at the time of preparation. However, no guarantee can be given with regard to the correctness and completeness of this information and data. The same applies to the evaluations and statements contained in the analyzes and market assessments by JS Research UG (limited liability). These were created with the necessary care. Any responsibility or liability for the correctness and completeness of the information contained in this publication is excluded. All statements of opinion made reflect the current assessment of the author, which can change at any time without prior notice. No guarantee or liability is expressly assumed that the price or profit developments forecast by JS Research UG (limited liability) will occur. Information on conflicts of interest: The editors and responsible authors hereby declare that the following conflicts of interest with regard to the Tudor Gold company discussed in this publication existed at the time of publication: I. Authors and the publisher as well as consultants and clients related to them do not hold any shares at the time of publication in Tudor Gold and reserve the right to sell these at any time and without notice or to take new positions in Tudor Gold. II. Authors and the publisher and client as well as consultants closely related to them have a consulting mandate with Tudor Gold at the time of publication and receive payment for this. The authors and the editor know that other stock market letters, media or research firms are reviewing Tudor Gold shares during the same period. Therefore, during this period of time, information and opinions are generated symmetrically. This publication by JS Research UG (limited liability) is expressly not a financial analysis, but a publication of a very clear and clearly promotional character on behalf of the company under discussion and thus to be understood as an advertising / marketing message. According to §34 WpHG I point out that Jörg Schulte, JS Research UG (limited liability) or employees of the company do not hold any shares in Tudor Gold and continue to buy or sell their own businesses in the shares of the companies presented at any time (e.g. long or short positions) can. We expressly point out a conflict of interest.
