=====

Already 27 million ounces of gold equivalent delineated on the project...

Another monster drill hole fuels takeover fantasy – new potential exploration target 50-70 million ounces of Gold Eq!

Profit now from attractive low stock prices - 'tax loss selling season' in final stages... Another WORLD CLASS drill hole with 0.97 g / t Gold Eq over 1,320 meters published, causes a sensation in the market! No major producer can ignore this unique gold project!

Introduction:

- The drill season this year on 'Treaty Creek' was just as spectacular as last year!
- Two new zones ('Eureka' and 'CBS') of mineralization (targets) with amazing high grade gold intervals were discovered this year.
- This first-class gold developer has already an initial Resource of 27.3 million ounces AuEq on his world-class project, with TOP infrastructure connection nearby!
- Strong exploration success in the third year! Two more world-class drill holes were released in late November:

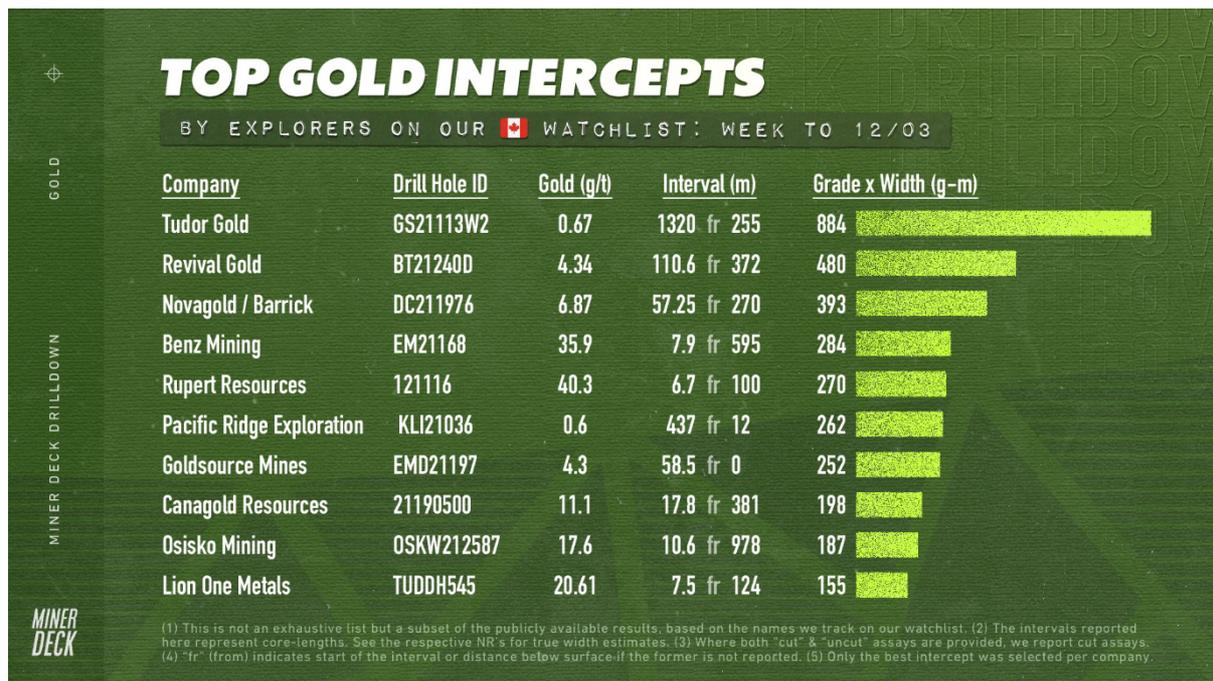

Step Out Hole GS-21-113-W2 intersected 0.97 g/t Gold Eq over 1,320 meters and GS-21-113-W1 hit an interval of 4.07 g/t Gold Eq over 78,0 meters, within 459.0 meters at 1.30 g/t Gold Eq.

At least now it should be clear that in the direction of the north-west and north-east of the 'Goldstorm' deposit, the existing resource will be clearly expanded again, and that combined with significantly higher ore grades!

Dear Readers,

Only world-class exploration and project development companies like **Tudor Gold** (TSXV: TUD) can consistently deliver exceptional drill results!

According to the press release from November 30th ([link here](#)), "Monster drill hole" **GS-21-113-W2** made it again to the **number one in the ranking of the best drill holes worldwide:**

[Source: Twitter, Miner Deck](#)

The highlights from the press release of November 30, 2021:

- **0.97 g/t Gold Eq over 1,320 meters, including 1.38 g/t Gold Eq over 556.5 meters in the northwest step-out drill hole (GS-21-113-W2)**
- **The strongest mineralization was cut in the northernmost section of the 300H domain at drill hole **GS-21-113-W1** grading **4.07 g/t Gold Eq over 78.0 meters, within 459.0 meters grading 1.30 g/t Gold Eq.****

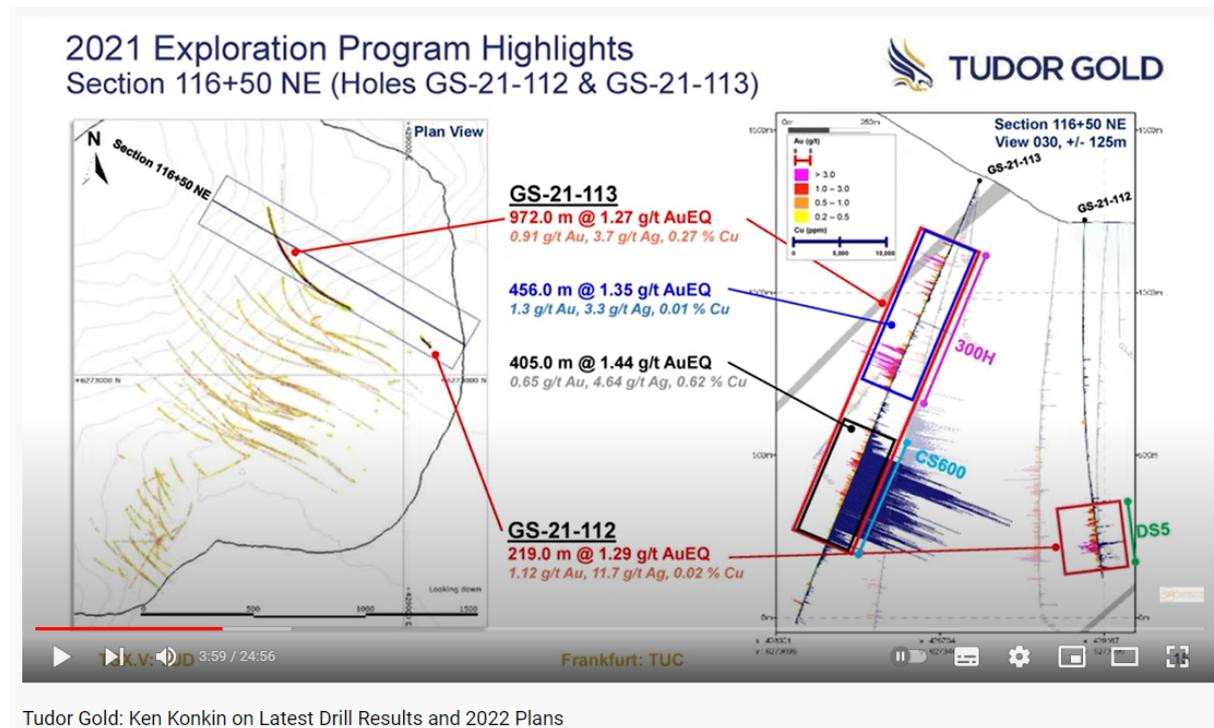

Ken Konkin, Tudor Gold's new President and CEO, states in the press release:

*"We are very pleased to report these exceptional drilling results that continue to increase the dimensions of the Goldstorm Deposit, with some of the most impressive gold-copper mineralization observed to-date. **We have significantly expanded the deposit to the north, northwest and at depth. Drill hole GS-21-113-W2 is the deepest intercept in the Goldstorm system. This hole ended in very strong gold-copper and associated silver mineralization within the CS600 domain. Clearly, much more drilling is required to constrain the deposit which appears to have the greatest potential for continued expansion to the northeast and northwest.***

This system has proven to be much larger than we previously expected and, combined with our recent discoveries at Perfect Storm, Eureka and Calm Before the Storm, gives this Project un-paralleled economic potential as one of the largest gold projects in the world."

On December 6th, Jochen Staiger from Swiss Resource Capital AG / Commodity-TV conducted a trully informative interview with Ken Konkin about the 2021 drilling season:

Tudor Gold: Ken Konkin on Latest Drill Results and 2022 Plans

[Source: Interview with Ken Konkin by Jochen Staiger of Commodity-TV / Swiss Resource Capital AG](#)

Some details from the 2021 exploration program

Successful step-out drilling to the north / north-east and north-west of the Goldstorm deposit resulted in identified higher ore grades in gold mineralization.

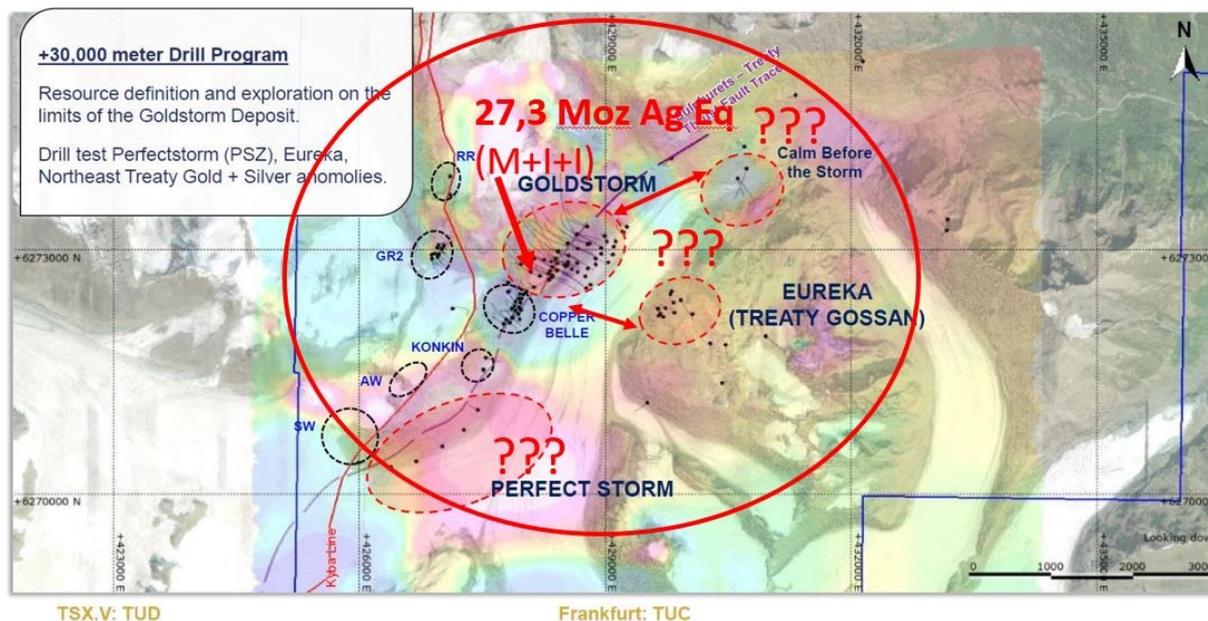

The combination of these 'step-out' holes and successful infill holes should increase the existing initial mineral resource estimate for Goldstorm of currently **27.3 million ounces of Gold Eq** (19.4 million ounces of gold eq in the M + I category plus others 7.9 million ounces in the inferred category) **MASSIVELY!**

The company was again successful at the 'Perfect Storm Zone' drill target, **intercepting 118.6 meters with 0.721 g/t Gold Eq** (in drill hole PS-21-06). We expect that this drill target will be further explored in 2022.

There are various highly promising drill targets on Tudor Gold's flagship project 'Treaty Creek'. These include 'Perfect Storm' / 'Goldstorm / Copper Belle' and the two new discoveries in 2021 'Eureka' and CBS ('Calm before the Storm')!

Can we expect **50 to 70 million ounces of gold** in the Treaty Creek property?

2021 Exploration Program Plan Map

Source: Tudor Gold / JS Research UG

The flagship project 'Treaty Creek' from **Tudor Gold Corp.** (WKN: A2AJ7Y, Frankfurt: TUC / TSXV: TUD) is already one of the world's largest undeveloped mineral resources with **27.3 million ounces of gold equivalent!**

This year's exploration program has again confirmed, the 'Goldstorm' zone is massively expanded with various 'step-out' drill holes.

Most notable: Gold mineralization (grades) have increased strongly towards the north-east and north-west direction. For example, Tudor Gold was able to identify the strongest mineralization so far in the northernmost section of the '300H' domain at drill hole GS-21-113-W1:

This world class drill hole intersected **4.07 g/t Gold Eq over 78.0 meters, within 459.0 meters of 1.30 g / t Gold Eq!**

In addition, with 'Eureka' and 'CBS', two further highly promising geological targets were identified.

We are excited about Tudor Gold's very successful 2021 exploration program!

(WKN: A2AJ7Y, Frankfurt: TUC, TSX-V: TUD)

For all new readers, we have briefly put together some background information on Tudor Gold:

Tudor Gold is a precious and base metal exploration company with properties in the 'Golden Triangle' of British Columbia, an area of producing or past producing mines and several large deposits near potential development. The 17,913 hectare Treaty Creek project (in which Tudor Gold has a 60% interest) is bordered to the southwest by Seabridge Gold Inc.'s KSM property and to the southeast by Pretium Resources Inc.'s Brucejack property. The company controls 100% of the 'Electrum' project. In addition, Tudor has 'earn-in' options and is 100% involved in other projects in the 'Golden Triangle'.

From the southwest corner of the Treaty Creek claims bordering Seabridge Gold's concession areas, the Sulfurets Thrust Fault leads from the Seabridge Iron Cap deposit to the Tudor Gold Goldstorm system. **The 'Goldstorm' zone is located five kilometers northeast of Seabridge's 'Iron Cap' deposit.**

The "Golden Triangle" region is one of the productive gold regions in Canada - over 145 million ounces of gold and over 50 billion pounds of copper have already been found in the immediate vicinity by the world-class explorer Tudor Gold!

Top Facts & Highlights about Tudor Gold Corp:

- ✓ **Initial resource estimate published on Treaty Creek in March 2021: 27.3 million ounces of Au Eq (of which 19.4 million ounces at 0.74 g / t Au Eq in the Measured and Indicated resource category)**
- ✓ **Enormous exploration potential** – most parts of the exploration projects are still largely unexplored. There are several **high potential exploration targets on Treaty Creek** (e.g. 'Perfect Storm' / 'Eureka' / 'Calm before the Storm').

- ✓ The company plans to spin-out the 'Crown' project in the next few months: Shareholders should get for every 1 Tudor in ownership approx. 0.253 in the new established Goldstorm Metals Corp. ([See link to the news release here](#))
- ✓ **Prime location:** Huge land package in the famous Canadian 'Golden Triangle' region - **more than 145 million ounces of gold and 50 billion Pounds of copper have already been discovered within a few kilometers to Treaty Creek.**
- ✓ The flagship project 'Treaty Creek' is right next to the largest world-class deposits and mines. (Seabridge Gold and Pretium Resources)
- ✓ Extremely promising project portfolio with over **35,518 hectares** of concession areas, spread over four projects.
- ✓ Treaty Creek' is close to good infrastructure: **the nearest road and power line are only around 25 km away.**
- ✓ There is running water all year round on Treaty Creek - this is an important requirement for future mining operations.
- ✓ Excellent geological location of the acquired land packages in mining-friendly British Columbia, Canada.
- ✓ **Top Management** - Very experienced and successful team led by the award-winning geologist **Ken Konkin**, who was appointed as President & CEO on December 21, 2021. He was instrumental in the discovery of Pretium Resources 'The Valley of Kings' deposit.
- ✓ Founder of Tudor Gold is the renowned **Walter Storm**, who was also Co-founder of the Canadian mining company Osisko Mining. Mr. Storm is the Chairman of Tudor Gold and is the Chairman of the Board of Directors.
- ✓ **World-class drill results at flagship project ,Treaty Creek': e.g.**
 - **Drill hole GS-21-113-W2: 0.97 g/t Au Eq over 1,320 meters including 1.38 g/t Au Eq over 556,5 meters;**
 - **Drill hole GS-20-65: 1.161 g/t AuEq over 930 meters including 2.12 g/t Au Eq over 348 meters;**
 - **Drill hole GS-20-92: 0.999 g/t Au Eq over 531 meters including 3.286 g/t Au Eq over 82.5 meters;**
 - **Drill hole GS-20-91: 0.856 g/t Au Eq over 1,033.5 meters including 1.112 g/t Au Eq over 532.5 meters;**
 - **Drill hole GS-20-83: 0.821 g/t Au Eq over 921 meters including 1.078 g/t Au Eq over 345 meters;**
 - **Drill hole GS-20-75: 0.741 g/t Au Eq over 1152 meters including 1.561 g/t Au Eq over 121.5 meters;**
 - **Drill hole GS-20-57: 0.845 g/t Au Eq over 973 meters including 1.40 g/t Au Eq over 217.5 meters;**
 - **Drill hole GS-20-64: 0.983 g/t Au Eq over 550.55 meters including 1.482 g/t Au Eq over 154.5 meters;**
 - **Drill hole GS-20-73: 0.932 g/t Au Eq over 775.5 meters including 1.502 g/t Au Eq over 229.5 metres;**

- Drill hole GS-19-42: 0.849 g/t Au Eq über 780 meters including 1.275 g/t Au Eq over 370.5 meters within the 300 horizon zone;

- ✓ Tudor Gold is a prime M&A acquisition target.
- ✓ **Strong support for the 'Tahltan First Nation'**: Signing of a commitment and communication agreement.
- ✓ **Clear vote of confidence** - as of November 5, 2021, close to 50% of the shares were hold by company founder **Walter Storm** (32.32 %) and commodity star investor **Eric Sprott** (17.58 %).

After surpassing the consolidation trendline, we see 3.60 CAD and then the all-time highs at 4.60 CAD as next feasible price targets!

Disclaimer, risk information and exclusion of liability: We expressly point out that we accept no liability for the content of external links. Every investment in securities is fraught with risks. Due to political, economic or other changes, there can be considerable price losses. This applies in particular to investments in (foreign) small caps as well as in small and microcap companies; Due to the low market capitalization, investments in such securities are highly speculative and involve an extremely high risk, including the total loss of the invested capital. In addition, some of the stocks presented by JS Research UG (limited liability) are subject to currency risks. The background information, market assessments and securities analysis published by JS Research UG (limited liability) for the German-speaking area were prepared in compliance with the Austrian and German capital market regulations and are therefore intended exclusively for capital market participants in the Republic of Austria and the Federal Republic of Germany; other foreign capital market regulations were not taken into account and do not apply in any way. The publications by JS Research UG (limited liability) are for informational purposes only and expressly do not represent a financial analysis, but are promotional texts of a purely advertising nature for the companies discussed, which typically pay a fee for this. There is no consulting contract between the reader and the authors or the publisher in existence by reading or subscribing the JS Research UG (limited liability) publications. All information and analysis do not constitute a solicitation, an offer or a recommendation to buy or sell investment instruments or for other transactions. Every investment in stocks, bonds, options or other financial products is subject to - in some cases considerable - risks. The publisher and authors of JS Research UG (limited liability) publications are not professional investment advisors!!! Therefore, it is essential that you always seek advice from a qualified specialist (e.g. your house bank or a qualified investment advisor you trust) when making investment decisions. All information and data published by JS Research UG (limited liability) come from sources which we consider to be reliable and trustworthy at the time of preparation. However, no guarantee can be given with regard to the correctness and completeness of the information and data. The same applies to the evaluations and statements contained in the analysis and market assessments by JS Research UG (limited liability). These were created with the necessary care. Any responsibility or liability for the correctness and completeness of the information contained in this publication is excluded. All statements of opinion made reflect the current assessment of the author, which can change at any time without prior notice. No guarantee or liability is expressly assumed that the price or profit development forecasts by JS Research UG (limited liability) will materialize.

Information on conflicts of interest: The editors and responsible authors hereby declare that the following conflicts of interest with regard to the Tudor Gold company discussed in this publication exist at the time of publication: I. At the time of publication, the authors hold shares in Tudor Gold and reserve the right to retain them sell or take new positions in Tudor Gold at any time and without notice. The authors and the publisher cannot rule out that other stock market letters, media or research firms may discuss Tudor Gold shares during the same period. Therefore, symmetrical generation of information and opinions can occur during this period. This publication by JS Research UG (limited liability) is expressly not a financial analysis, but a publication of a very clear and clearly promotional character and thus to be understood as an advertising / marketing message. According to §34 WpHG I would like to point out that the author, editors, clients or brokers hold shares, options or warrants at the time of publication and can increase or sell these positions at any time! This clearly and specifically creates a conflict of interest.

We expressly point out a conflict of interest. This also applies to options and derivatives based on these securities. Any resulting transactions may, under certain circumstances, affect the company's share price. The information, recommendations, interviews and company presentations published on the "websites", the newsletter or the research reports are usually paid for by the respective companies or third parties (so-called "third parties"). The "third parties" include, for example, investor relations and public relations companies, brokers or investors. JS Research UG (limited liability) or its employees can partially be compensated directly or indirectly for the preparation, electronic distribution and other services by the discussed companies or so-called "third parties" with an expense allowance. Even if we prepare each report to the best of our knowledge and belief, we advise you to consult other external sources, such as your house bank or a trusted investment advisor, with regard to your investment decisions. For this reason, liability for financial losses that may result from using the information discussed here for one's own investment decisions is categorically excluded. Particularly in the case of commodities and exploration stocks and low capitalized stocks, the portfolio proportions of individual shares should only be so much that even in the event of a total loss, the total portfolio value can only lose marginal value. In particular, stocks with a low market capitalization (so-called "small caps") and especially exploration stocks as well as all listed securities in general are subject to considerable price volatility. The liquidity in the securities can be correspondingly low. When investing in the commodity sector (exploration companies, raw material producers, companies developing raw material projects), additional risks must be taken into account. Below are some examples of specific risks in the commodity sector: Country risks, currency fluctuations, natural disasters and storms (e.g. floods, storms), changes in the legal situation (e.g. export and import bans, punitive tariffs, prohibition of raw material extraction or raw material exploration, nationalization of projects), environmental requirements (e.g. higher costs for environmental protection, designation of new environmental protection areas, prohibition of various mining methods), fluctuations in raw material prices and considerable exploration risks.

Disclaimer: All information published in the report is based on careful research. The information does not represent an offer to sell the shares discussed, nor an invitation to buy or sell securities. This report only reflects the personal opinion of Joerg Schulte and is in no way to be equated with a financial analysis. Before making any investments, professional

advice from your bank is essential. The statements are based on sources that the publisher and his staff consider to be trustworthy.
