Sizable 30,000-meter drill program has begun – Can this gold stock achieve similar gains of 849% like in 2020? A lot of news flow can be expected!

One of the world's largest gold mines can be built on 'Treaty Creek' in a mining-friendly region. This gold company is a prime takeover target! Various analyst reports underline the massive upside potential.

Introduction:

One of the largest drilling programs in the history of this world-class explorer with a planned 30,000 meters of drilling (phase 1) has begun! Position yourself in time.

+++

This world-class exploration company controls a significant gold resource of 27.3 million ounces Gold Eq across all categories!

+++

Important: Tudor Gold shareholders can look forward to receive valuable “free bonus shares” through the spin-out of the 'Crown Project' (to Goldstorm Metals Corp.)!

Dear Readers,

Smart commodity investors typically position themselves **RIGHT BEFORE** the start of the years exploration season by investing in promising companies. **Why?** Because investors can often secure **enormous price gains in a very short time**, provided that a company achieves strong exploration successes.

One such example is one of our gold favorites, **Tudor Gold Corp. (WKN: A2AJ7Y)**, with which readers have already been able to pocket several hundred percent in price gains, delivered in 2020. The actual consolidation in the entire gold sector is offering a very attractive entry opportunity.

Let's take a quick look at 2020: In the spring, BEFORE the start of the exploration program, Tudor shares were traded at CAD 0.475. After the company published outstanding drilling results, the price exploded in a few months by a sensational 849% to an all-time high of CAD 4.51.

This was due to the announcement of multiple very long gold drill intercepts at a new gold zone called 'Goldstorm' at their flagship project Treaty Creek in Canada.

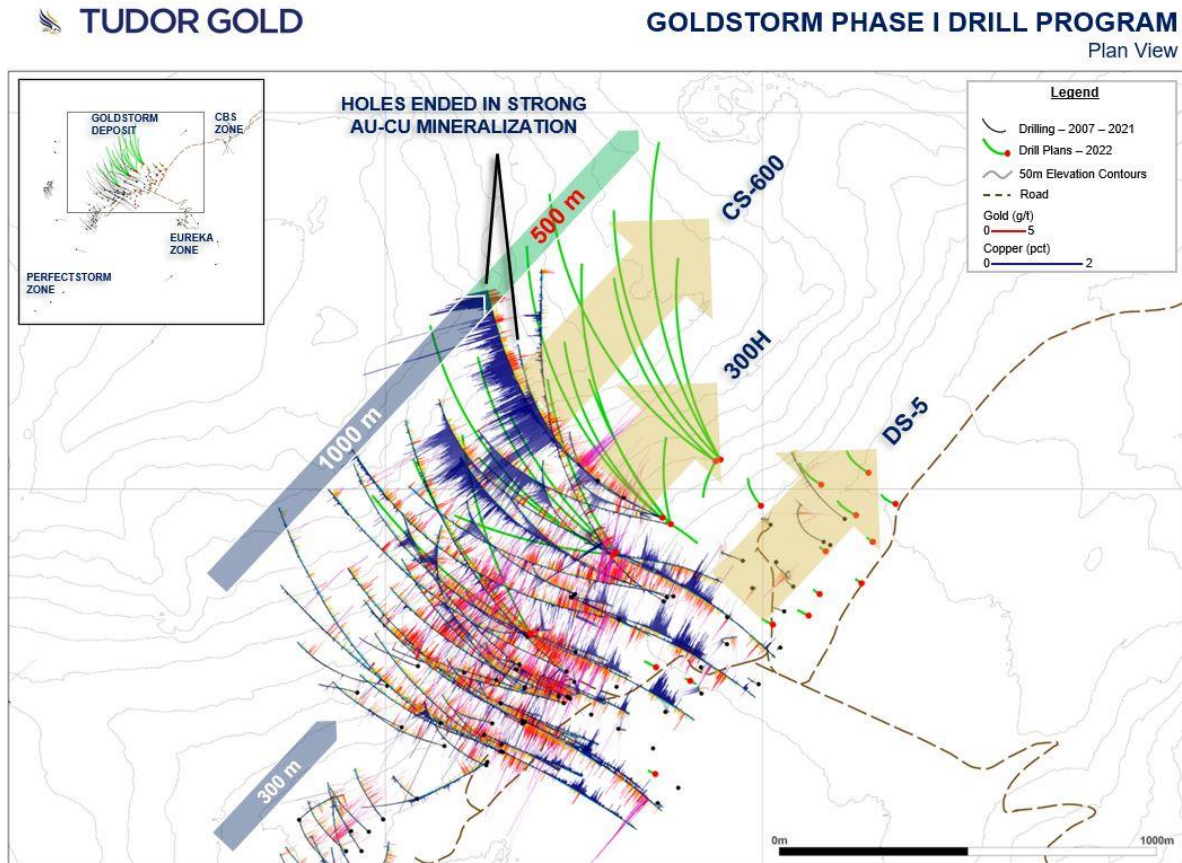

source: Stockcharts.com

On May 9th, Tudor Gold announced the start of this year's exploration program at Treaty Creek:

Read the most important highlights from the brand-new news release here: ([link here](#)):

- Tudor commenced a diamond drilling program (Phase 1) of 30,000 meters using up to 10 drill rigs.
- The fully funded program is designed to systematically test the expansion of the Goldstorm deposit well beyond the limits set in the initial mineral resource estimate, released in March 2021.
- The 2021 exploration drilling campaign successfully infilled key areas of Tudor's 2021 mineral resource with reported gold and copper grades that were **exceptionally higher** than ore grades reported in the 2021 mineral resource estimate.
- Tudor will conduct some step-out drills the Goldstorm system along the northeast axis for an additional 500 meters along the NE axis during the 2022 exploration program.

- In addition, exploration work will focus on the 'Calm Before the Storm' (CBS) and 'Eureka' (EZ) zones.

Source: Tudor Gold Corp.

Ken Konkin, President and CEO of Tudor Gold, comments:

“This year we have planned a very robust drilling campaign that will focus 80% of the exploration as continued step-out drilling from the latest impressive 2021 results obtained from holes GS-21-113, GS-21-113-W1, GS-21-113-W2 and GS-21-119 in the northern sector of the Goldstorm Deposit (Table 1).

The remaining 20% of planned holes will include Goldstorm resource definition drilling as well as exploration drill holes for CBS and Eureka gold systems.

Our Phase II plans will be contingent to the success of the Phase I drilling; we plan to concentrate our drilling in the areas that contain the strongest mineralization throughout the 300H, CS-600 and DS-5 domains.

We also plan to test the hypothesis that the Eureka Zone may be the continuation of the DS-5 domain. The Goldstorm Deposit continues to amaze our geological team as it remains open in all directions and to depth with some of the most impressive and strongest gold-copper mineralization obtained late last year within the northern areas of this deposit.”

Also very interesting is the brand new interview (Link: <https://youtu.be/owGxeiA9OgQ>) with President & CEO Ken Konkin, where he gives additional information about this year's **Phase 1** drill program:

Tudor Gold: CEO Update on Commenced Drill Plan I for Goldstorm in 2022

Source: Youtube, Link: <https://youtu.be/owGxeiA9OgQ>

In summary: There are various arguments for a immediate investment into the Tudor Gold shares:

- ✓ We expect in the next months the publishing of strong news flow from the recently started drill program.
- ✓ Perfect entry point: The seasonality speaks for stocks that are active in the Golden Triangle. The drilling season is typically between May and October. Investors traditionally position themselves **BEFORE** the start of the drilling season.
- ✓ On Tudor Gold's world-class Treaty Creek project has been already a huge resource of **27.3 million ounces of Gold Eq** (CB/Goldstorm) in all categories delineated. There remains tremendous potential for expansion with additional high prospect drill targets on the property e.g., 'Eureka' and 'Calm Before the Storm (CBS)'.

- ✓ **Extremely attractive stock valuation:** An ounce of gold is currently valued at less than \$20 per ounce of gold Eq. In the past, between 50 and 80 USD were often put on the table for M&A transactions.
- ✓ **Additional “bonus”:** Spin-out of the "Crown project" expected in the next few months. It is expected, that Tudor shareholders will receive bonus shares of Goldstorm Metals Corp.
- ✓ **The 2021 exploration program confirmed that ore grades are SIGNIFICANTLY higher in step-out drill holes towards the north/northeast direction of the Goldstorm deposit. Drill results from 2021 and 2022 will be incorporated into a new resource estimate.**

(WKN: A2AJ7Y, Frankfurt: TUC, TSX-V: TUD)

For all new readers, we have briefly put together some background information on Tudor Gold:

Tudor Gold is a precious and base metal exploration company with properties in the 'Golden Triangle' of British Columbia, an area of producing or past producing mines and several large deposits near potential development. The 17,913-hectare Treaty Creek project (in which Tudor Gold has a 60% interest) is bordered to the southwest by Seabridge Gold Inc.'s KSM property and to the southeast to Newcrest's (former Pretium Resources) 'Brucejack property'. The company controls 100% of the 'Crown' project. In addition, Tudor has 'earn-in' options and is 100% involved in other projects in the 'Golden Triangle'.

From the southwest corner of the Treaty Creek claims bordering Seabridge Gold's concession areas, the Sulfurets Thrust Fault leads from the Seabridge Iron Cap deposit to the Tudor Gold Goldstorm system. **The 'Goldstorm' zone is located five kilometers northeast of Seabridge's 'Iron Cap' deposit.**

A District of Giant Reserves and Resources

Tudor Gold's properties are strategically positioned next to some of the largest undeveloped and producing gold & copper resources in the world:

Seabridge's deposits contain reported Resources (M&I) totaling over 76.4 Million oz Gold & 17.6 Billion lbs Copper.

Goldstorm/Copper Belle Deposit contributes to Resources in the Sulphurets Mineral District; (M&I) 19.4 Million oz Gold Eq.

Crown Property: proposed spin-out into Goldstorm Metals Corp in the spring of this year.

Eskay North Property adjacent to Skeena's Eskay Creek.

Top Facts & Highlights about Tudor Gold Corp:

- ✓ **Initial resource estimate published on Treaty Creek in March 2021: 27.3 million ounces of Au Eq (of which 19.4 million ounces at 0.74 g / t Au Eq in the Measured and Indicated resource category)**
- ✓ **Enormous exploration potential** – most parts of the exploration projects are still largely unexplored. There are several **high potential exploration targets on Treaty Creek** (e.g. 'Perfect Storm' / 'Eureka' / 'Calm before the Storm').
- ✓ The company plans to spin-out the 'Crown' project in the next few months: Shareholders should get for every 1 Tudor in ownership approx. 0.253 in the new established Goldstorm Metals Corp. ([See link to the news release here](#))
- ✓ **Prime location:** huge land package in the famous Canadian 'Golden Triangle' region - **more than 145 million ounces of gold and 50 billion Pounds of copper have already been discovered within a few kilometers to Treaty Creek.**
- ✓ The flagship project 'Treaty Creek' is right next to the largest world-class deposits and mines. (Seabridge Gold and Newcrest Mining)
- ✓ Extremely promising project portfolio with over **35,518 hectares** of concession areas, spread over three projects.
- ✓ Treaty Creek' is close to good infrastructure: **the nearest road and power line are only around 25 km away.**
- ✓ There is running water all year round on Treaty Creek - this is an important requirement for future mining operations.
- ✓ Excellent geological location of the acquired land packages in mining-friendly British Columbia, Canada.

- ✓ **Top Management** - Very experienced and successful team led by the award-winning geologist **Ken Konkin**, who was appointed as President & CEO on December 21, 2021. He was instrumental in the discovery of Pretium Resources 'The Valley of Kings' deposit (now Newcrest).
- ✓ Founder of Tudor Gold is the renowned **Walter Storm**, who was also Co-founder of the Canadian mining company Osisko Mining. Mr. Storm is the Chairman of Tudor Gold and is the Chairman of the Board of Directors.
- ✓ **World-class drill results at flagship project ,Treaty Creek': e.g.**
 - Drill hole GS-21-113-W2: 0.97 g/t Au Eq over 1,320 meters including 1.38 g/t Au Eq over 556,5 meters;
 - Drill hole GS-20-65: 1.161 g/t AuEq over 930 meters including 2.12 g/t Au Eq over 348 meters;
 - Drill hole GS-20-92: 0.999 g/t Au Eq over 531 meters including 3.286 g/t Au Eq over 82.5 meters;
 - Drill hole GS-20-91: 0.856 g/t Au Eq over 1,033.5 meters including 1.112 g/t Au Eq over 532.5 meters;
 - Drill hole GS-20-83: 0.821 g/t Au Eq over 921 meters including 1.078 g/t Au Eq over 345 meters;
 - Drill hole GS-20-75: 0.741 g/t Au Eq over 1152 meters including 1.561 g/t Au Eq over 121.5 meters;
 - Drill hole GS-20-57: 0.845 g/t Au Eq over 973 meters including 1.40 g/t Au Eq over 217.5 meters;
 - Drill hole GS-20-64: 0.983 g/t Au Eq over 550.55 meters including 1.482 g/t Au Eq over 154.5 meters;
 - Drill hole GS-20-73: 0.932 g/t Au Eq over 775.5 meters including 1.502 g/t Au Eq over 229.5 metres;
 - Drill hole GS-19-42: 0.849 g/t Au Eq über 780 meters including 1.275 g/t Au Eq over 370.5 meters within the 300 horizon zone;
- ✓ Tudor Gold is a prime M&A acquisition target.
- ✓ **Strong support for the 'Tahltan First Nation'**: Signing of a commitment and communication agreement.
- ✓ **Clear vote of confidence** - as of May 9, 2022, close to 47% of the shares were held by company founder and Chairman **Walter Storm** (29.28%) and commodity star investor **Eric Sprott** (17.61%).

Disclaimer, risk information and exclusion of liability: We expressly point out that we accept no liability for the content of external links. Every investment in securities is fraught with risks. Due to political, economic or other changes, there can be considerable price losses. This applies in particular to investments in (foreign) small caps as well as in small and microcap companies; Due to the low market capitalization, investments in such securities are highly speculative and involve an extremely high risk, including the total loss of the invested capital. In addition, some of the stocks presented by JS Research UG (limited liability) are subject to currency risks. The background information, market assessments and securities analysis published by JS Research UG (limited liability) for the German-speaking area were prepared in compliance with the Austrian and German capital market regulations and are therefore intended exclusively for capital market participants in the Republic of Austria and the Federal Republic of Germany; other foreign capital market regulations were not taken into account and do not apply in any way. The publications by JS Research UG (limited liability) are for informational purposes only and expressly do not represent a financial analysis but are promotional texts of a purely advertising nature for the companies discussed, which typically pay a fee for this. There is no consulting contract between the reader and the authors or the publisher in existence by reading or subscribing the JS Research UG (limited liability) publications. All information and analysis do not constitute a solicitation, an offer or a recommendation to buy or sell investment instruments or for other transactions. Every investment in stocks, bonds, options or other financial products is subject to - in some cases considerable - risks. The publisher and authors of JS Research UG (limited liability) publications are not professional investment advisors!!! Therefore, it is essential that you always seek advice from a qualified specialist (e.g. your house bank or a qualified investment advisor you trust) when making investment decisions. All information and data published by JS Research UG (limited liability) come from sources which we consider to be reliable and trustworthy at

the time of preparation. However, no guarantee can be given with regard to the correctness and completeness of the information and data. The same applies to the evaluations and statements contained in the analysis and market assessments by JS Research UG (limited liability). These were created with the necessary care. Any responsibility or liability for the correctness and completeness of the information contained in this publication is excluded. All statements of opinion made reflect the current assessment of the author, which can change at any time without prior notice. No guarantee or liability is expressly assumed that the price or profit development forecasts by JS Research UG (limited liability) will materialize.

Information on conflicts of interest: The editors and responsible authors hereby declare that the following conflicts of interest with regard to the Tudor Gold company discussed in this publication exist at the time of publication: I. At the time of publication, the authors hold shares in Tudor Gold and reserve the right to retain them sell or take new positions in Tudor Gold at any time and without notice. The authors and the publisher cannot rule out that other stock market letters, media or research firms may discuss Tudor Gold shares during the same period. Therefore, symmetrical generation of information and opinions can occur during this period. This publication by JS Research UG (limited liability) is expressly not a financial analysis, but a publication of a very clear and clearly promotional character and thus to be understood as an advertising / marketing message. According to §34 WpHG I would like to point out that the author, editors, clients or brokers hold shares, options or warrants at the time of publication and can increase or sell these positions at any time! This clearly and specifically creates a conflict of interest.

We expressly point out a conflict of interest. This also applies to options and derivatives based on these securities. Any resulting transactions may, under certain circumstances, affect the company's share price. The information, recommendations, interviews and company presentations published on the "websites", the newsletter or the research reports are usually paid for by the respective companies or third parties (so-called "third parties"). The "third parties" include, for example, investor relations and public relations companies, brokers or investors. JS Research UG (limited liability) or its employees can partially be compensated directly or indirectly for the preparation, electronic distribution and other services by the discussed companies or so-called "third parties" with an expense allowance. Even if we prepare each report to the best of our knowledge and belief, we advise you to consult other external sources, such as your house bank or a trusted investment advisor, with regard to your investment decisions. For this reason, liability for financial losses that may result from using the information discussed here for one's own investment decisions is categorically excluded. Particularly in the case of commodities and exploration stocks and low capitalized stocks, the portfolio proportions of individual shares should only be so much that even in the event of a total loss, the total portfolio value can only lose marginal value. In particular, stocks with a low market capitalization (so-called "small caps") and especially exploration stocks as well as all listed securities in general are subject to considerable price volatility. The liquidity in the securities can be correspondingly low. When investing in the commodity sector (exploration companies, raw material producers, companies developing raw material projects), additional risks must be taken into account. Below are some examples of specific risks in the commodity sector: Country risks, currency fluctuations, natural disasters and storms (e.g. floods, storms), changes in the legal situation (e.g. export and import bans, punitive tariffs, prohibition of raw

material extraction or raw material exploration, nationalization of projects), environmental requirements (e.g. higher costs for environmental protection, designation of new environmental protection areas, prohibition of various mining methods), fluctuations in raw material prices and considerable exploration risks.

Disclaimer: All information published in the report is based on careful research. The information does not represent an offer to sell the shares discussed, nor an invitation to buy or sell securities. This report only reflects the personal opinion of Joerg Schulte and is in no way to be equated with a financial analysis. Before making any investments, professional advice from your bank is essential. The statements are based on sources that the publisher and his staff consider to be trustworthy. Nevertheless, no liability can be assumed for the correctness of the content. No guarantee is given for the accuracy of the charts and data on the commodity, currency and stock markets shown. The source language (usually English) in which the original text is published is the official, authorized and legally valid version. This translation is included for better understanding.
