
Preamble:

The original article was first published in German language, representing the default version. ([Link here](#)). No responsibility or liability is assumed for the content, correctness, appropriateness or accuracy of this translation. This promotional article is in no way a purchase (buy) or trade recommendation for the bespoke financial instruments! The target group for this article translation are English-speaking readers residing in Germany.

This gold stocks belongs in every equity portfolio and is your personal inflation lifeboat! Multi bagger opportunity!

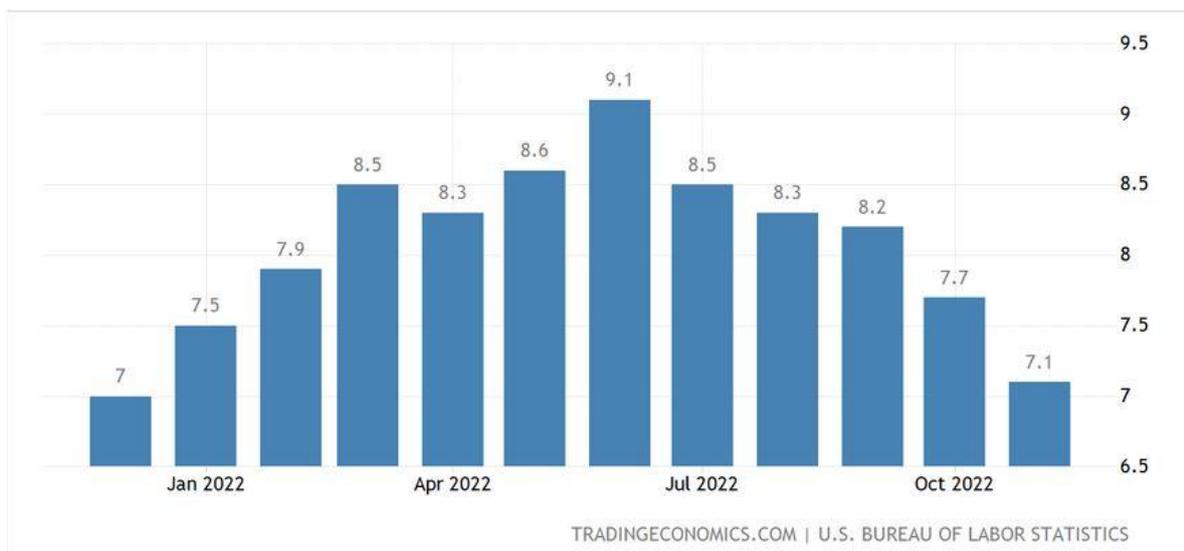

One of the world's largest gold mines might be built on the 'Treaty Creek' property which is located in a mining-friendly region in Canada. This gold company is and remains a prime takeover target! Various analyst reports underline the massive upside potential.

Also in 2022, this world-class precious metal explorer delivered a strong and convincing drilling program with over 42,000 meters of drilling!

Various drill holes have again confirmed the uniqueness of this world-class deposit with has already an existing initial mineral resource estimate of over 27 million ounces of gold equivalent!

Dear Readers,

Inflation rates are exploding worldwide and even though the **inflation rate in the USA in December reached 7.1%** and was below the summer high (**at 9.1%**), market participants and consumers are painfully feeling the cost explosions in food and energy costs every day.

Source: Tradingeconomics.com / U.S. Bureau of Labor Statistics

There are many reasons for rising inflation numbers:

Disruption in supply chains, material bottlenecks and increased energy costs also as a result of the Ukraine war. In addition, there has been also massive government spending in the last two years in connection with the Corona crisis.

Even if the probability of a **hyperinflation** is currently low, consumer prices are likely to remain at elevated levels in the coming quarters. And since the current inflation rates in the USA are still well above the FED target of 2%, central banks will probably be lowering interest rates only in the event of catastrophic economy or unemployment developments. The situation on the capital markets will remain exciting and challenging in 2023...

Hyperinflation has happened in many countries throughout world history. Let's look at the historical price development for selected products in early German history during the Weimar Republic in 1923:

Prices for different goods and services in Berlin on June 9, 1923:

- 1 egg – 800 marks
- 1 liter of milk – 1440 marks
- 1 kilo of potatoes – 5000 marks
- 1 tram ride – 600 marks
- 1 dollar equaled 100,000 marks.

Prices for different goods and services in Berlin on December 2, 1923:

- 1 egg – 320 billion marks
- 1 liter of milk - 360 billion marks
- 1 kilo of potatoes – 90 billion marks
- 1 tram ride – 50 billion marks
- 1 dollar corresponded to 4.21 trillion marks.

Gold and gold stocks have always been THE ULTIMATE LIFEBOAT, navigating savers well through uncertain times. And the current times are anything but stable...

The highly exciting and currently extremely undervalued Canadian resource stock Tudor Gold Corp. controls a 27 million ounces Gold Eq deposit in Canada. This stock could be your personal "lifeboat" in these turbulent times.

(WKN: A3D078, Frankfurt: H56, TSX-V: TUD)

The Company released on December 14 an insightful summary of the conducted and completed **drill programs of 2021 and 2022** ([please see the link to the news release here](#)).

Let's have a brief look at the highlights:

- **The 2021 exploration program comprised of 30 drill holes totaling 30,108 metres!**
- **The 2022 exploration program comprised of 55 drill holes totaling 42,318 meters!**
- **Results from the 2021 and 2022 drill programs will be included in the next updated Mineral Resource estimate for the Goldstorm Deposit, which is anticipated to be released in the first half of 2023.**
- Tudor Gold's objective is to optimize the current Mineral Resource by concentrating on higher grades to increase the overall quality of gold, silver, and copper resources. As a result, the Company is focused on delivering an enhanced Mineral Resource Estimate on the Goldstorm Deposit which will improve the overall prospects of the Treaty Creek Project as it advances towards a Preliminary Economic Assessment (PEA).
- **Excellent results from infill and step-out drilling**, which consistently encountered stronger than expected gold, copper and silver mineralization outside the previously defined resource area of the Goldstorm Deposit to depth and along the northeastern axis by at least 500 m to the north and northeast. It has been observed, that drill holes in this area have intercept higher grades than those derived from the 2021 Initial Mineral Resource estimate.

- **Extended drill hole GS-21-113-W2 by 280.1 m**, which intercepted higher gold and copper grades at depth within the northern step-out area of the Goldstorm Deposit.

This hole returned an **intercept of 1,497.5 m of 1.12 g/t AuEQ (0.76 g/t Au, 3.70 g/t Ag, 0.27 % Cu)** with the strongest mineralization occurring between 1520 m and 1688 m down hole, averaging **2.48 g/t AuEQ (1.41 g/t Au, 9.07 g/t Ag, 0.82 % Cu) over 168 m**.

- **A number of new high-grade intervals of visible gold mineralization were drilled** within and outside the limits of the Goldstorm deposit, notably hole GS-22-134, assaying **20.86 g/t Gold Eq (20.61 g/t gold, 1.50 g/t silver, 0.20% copper) over 4.5 meters within a 25.5-meter-long zone of 9.96 gold Eq (9.66 g/t gold, 1.23 g/t silver, 0.24% copper)**. The hole contained 17 occurrences of visible gold within quartz-pyrite stockwork veins.
- **Stronger than expected copper grades were encountered within the CS600 domain** at the Goldstorm deposit, particularly in hole GS-22-159 with an interval over 180 meters of 1.71 g/t Gold Eq (0.92 g/t gold, 6.10 g/t silver and 0.61% copper). This hole ended in strong copper mineralization that is part of a much larger composite over 489.0 meters averaging 1.12 g/t Au Eq (0.66 g/t Au, 3.60 g/t Ag, 0.36% copper).
- **Confirmation of the discovery of a new mineralized zone called Route 66** in the southern portion of the Goldstorm deposit. This new higher-grade gold zone was originally intersected by hole GS-20-66 in 2020 and followed up by hole GS-22-135 in 2022. This was a 100-meter step out hole that intersected the up-dip expression of the zone and returned 1.42 g/t Gold Eq over 55.5 meters (1.38 g/t gold, 1.03 g/t silver, 0.02% copper).
- **Improved definition and spatial continuity of the Goldstorm porphyry system**, which consists of four separate mineral domains over an area approximately 2,500 meters long, 1,000 meters wide and 1,400 meters deep. **The Goldstorm deposit remains open to the south, north, northeast and at depth.**
- **New drill discoveries were made at the Perfectstorm, Calm Before the Storm and Eureka zones** where multiple diamond drill holes intersected significant gold, copper and silver mineralization. These drill holes will be followed up by subsequent exploration programs, but the priority will be to drill off-bounds at the Goldstorm deposit in 2023.

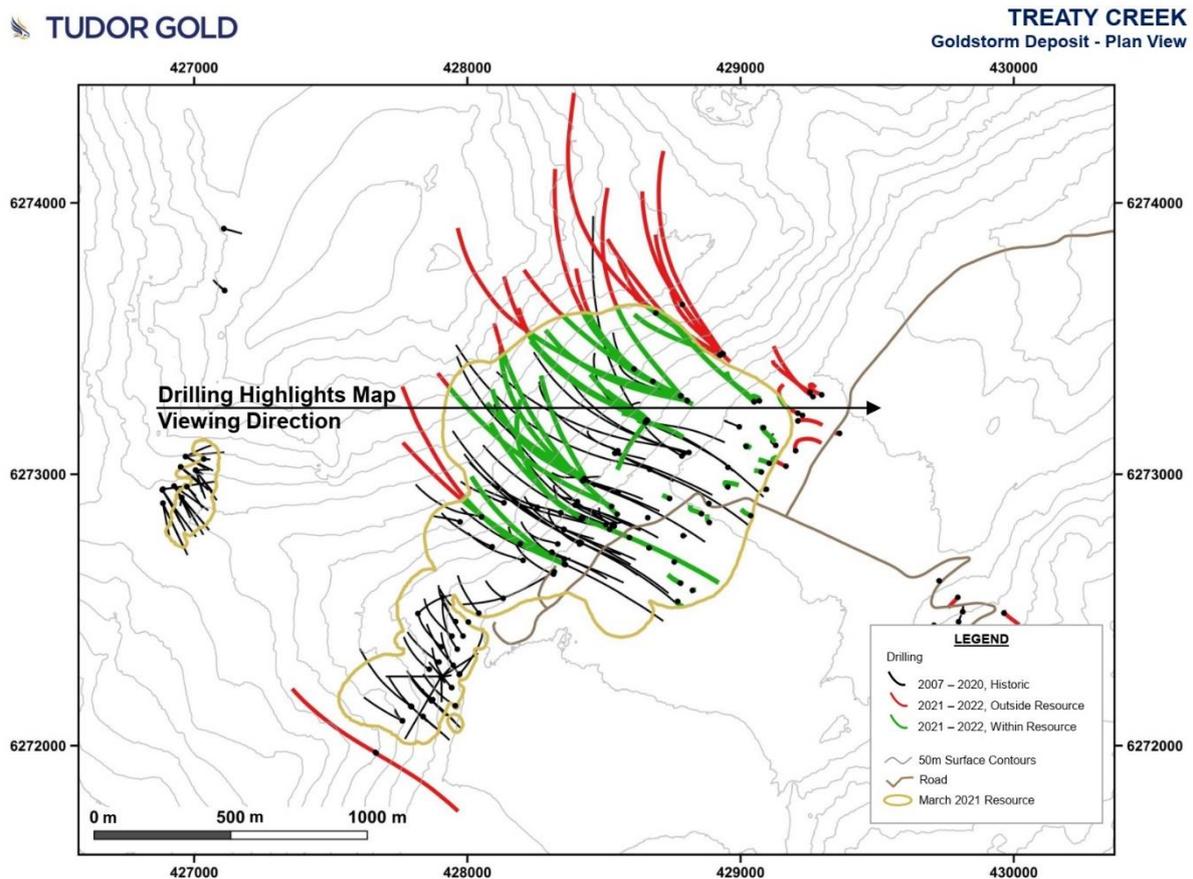

Ken Konkin, President and CEO of Tudor Gold comments:

“Over the past two years, we have seen significant expansion to our Goldstorm Deposit during these very successful drill campaigns, particularly in the northern aspect of the deposit.

Additionally, we exposed significant precious metal values in three other bulk-tonnage targets: Eureka, Calm Before the Storm and Perfectstorm.

Perfectstorm is the largest of these three targets and is located equidistant between the Goldstorm Deposit and Seabridge Gold’s Iron Cap Deposit, a mere three kilometers from each of those deposits. The Treaty Creek project continues to hold incredible geological potential for discovery of several large intrusive-related and porphyry-type targets.”

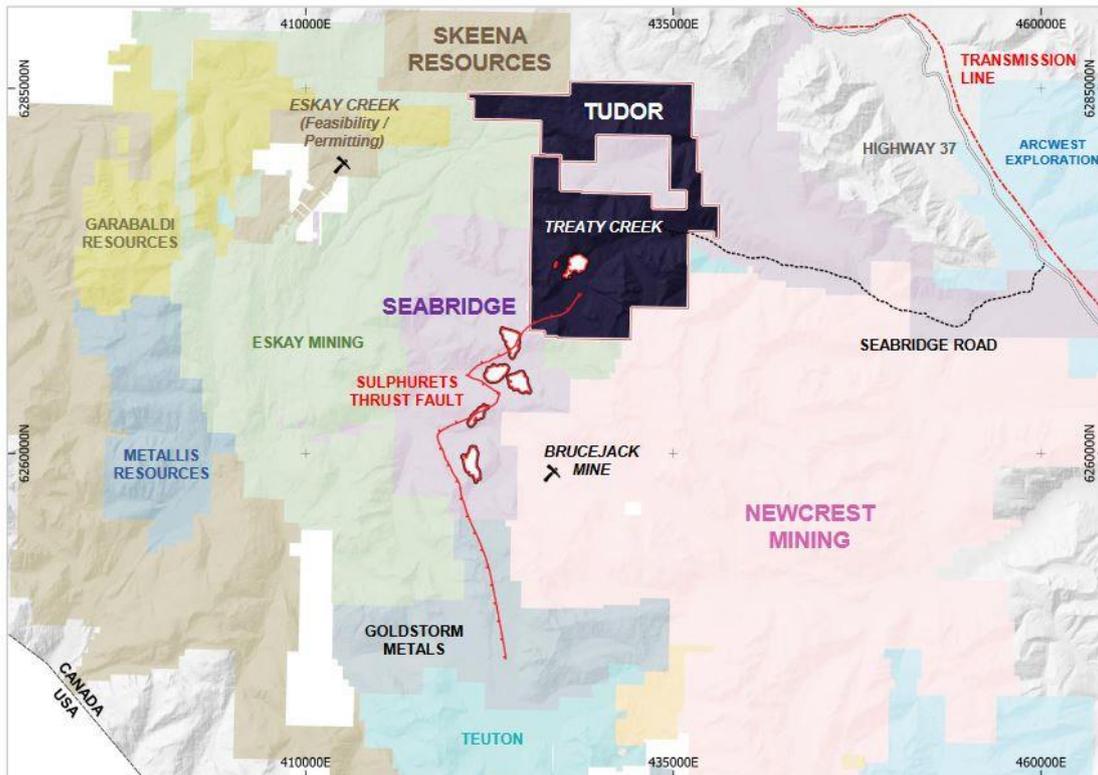

The Goldstorm porphyry system comprises four separate mineral domains over an area approximately 2,500 meters long, 1,000 meters wide and 1,400 meters deep.

For all new readers, here is some background information on Tudor Gold:

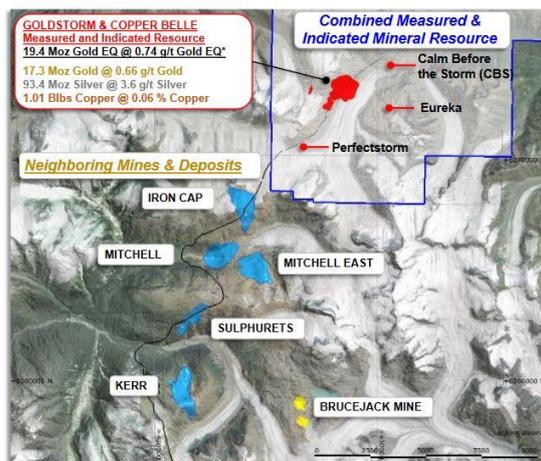

Tudor Gold is a precious and base metal exploration company with properties in the 'Golden Triangle' of British Columbia, an area of producing or past producing mines and several large deposits near potential development. The 17,913-hectare Treaty Creek project (in which Tudor Gold has a 60% interest) is bordered to the southwest by Seabridge Gold Inc.'s KSM property and to the southeast to Newcrest's Mining.

Source: Tudor Gold Corp.

From the southwest corner of the Treaty Creek claims bordering Seabridge Gold's concession areas, the Sulfurets Thrust Fault leads from the Seabridge Iron Cap deposit to the Tudor Gold Goldstorm system. **The 'Goldstorm' zone is located five kilometers northeast of Seabridge's 'Iron Cap' deposit.**

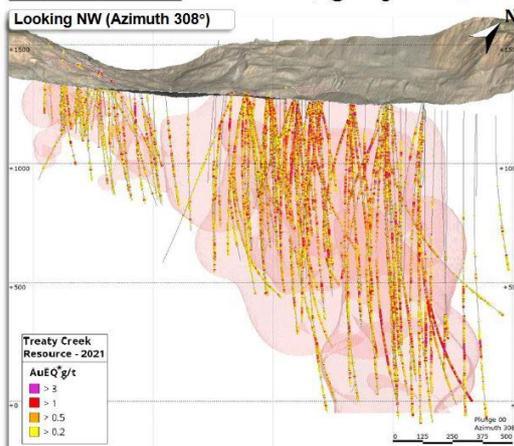

Regional Mineral Deposit Continuity

*This Mineral Resource is derived from the Technical Report. The Technical Report was prepared in accordance with NI 43-101 and is available to view on the Company's SEDAR profile. Please refer to Slide 11 of this presentation for a breakdown of each category of mineral resources, the grade or quality and quantity of each category of mineral resources, and the grade of each metal or mineral used to establish the metal or mineral equivalent grade.

Tudor's Treaty Creek 2021 Resource:
Combined Measured and Indicated Mineral Resource: 19.4 M Oz Gold EQ* @ 0.74 g/t Gold EQ*

Inferred Mineral Resource: 7.9 M Oz Gold EQ* @ 0.79 g/t Gold EQ*

Source: Tudor Gold Corp.

Top Facts & Highlights about Tudor Gold Corp:

- ✓ Initial resource estimate published on Treaty Creek in March 2021: 27.3 million ounces of Gold Eq (of which 19.4 million ounces at 0.74 g/t Gold Eq in the Measured and Indicated resource category)
- ✓ Enormous exploration potential exist - There are several high potential exploration targets on Treaty Creek (e.g. 'Perfect Storm' / 'Eureka' / 'Calm before the Storm').
- ✓ **Prime location:** Big land package of 17,913 hectares (Treaty Creek) in the famous Canadian 'Golden Triangle' region - **more than 145 million ounces of gold and 50 billion Pounds of copper have already been discovered within a few kilometers to Treaty Creek.**
- ✓ The flagship project 'Treaty Creek' is right next to the largest world-class deposits and mines. (Seabridge Gold and Newcrest Mining)
- ✓ Treaty Creek' is close to good infrastructure: **the nearest road and power line are only around 25 km away.**
- ✓ There is running water all year round on Treaty Creek - this is an important requirement for future mining operations.
- ✓ Excellent geological location of the acquired land packages in mining-friendly British Columbia, Canada.
- ✓ **Top Management** - Very experienced and successful team led by the award-winning geologist **Ken Konkin**, who was appointed as President & CEO on December 21, 2021. He was instrumental in the discovery of Pretium Resources 'The Valley of Kings' deposit (now Newcrest).

- ✓ Founder of Tudor Gold is the renowned **Walter Storm**, who was also Co-founder of the Canadian mining company Osisko Mining. Mr. Storm was the Chairman of Tudor Gold until his death in June 2022.
- ✓ **World-class drill results at flagship project ,Treaty Creek': e.g.**
 - Drill hole GS-22-134: 20.86 g/t Au Eq over 4.50 meters within an intercept of 25.5 meters of 9.96 g/t Au Eq;
 - Drill hole GS-22-158: 1.82 g/t Au Eq over 114 meters within an intercept of 592.5 meters of 1.16 g/t Au Eq;
 - Drill hole GS-22-159: 1.71 g/t Au Eq over 180 meters within an intercept of 489.0 meters of 1.12 g/t Au Eq;
 - Drill hole GS-22-143: 70.96 g/t Au Eq over 1.00 meter within an intercept of 2.00 meters of 39.15 g/t Au Eq;
 - Drill hole GS-21-113-W2: 1.12 g/t Au Eq over 1,497.5 meters including 2.48 g/t Au Eq over 168.0 meters;
 - Drill hole GS-20-65: 1.161 g/t AuEq over 930 meters including 2.12 g/t Au Eq over 348 meters;
 - Drill hole GS-20-92: 0.999 g/t Au Eq over 531 meters including 3.286 g/t Au Eq over 82.5 meters;
 - Drill hole GS-20-91: 0.856 g/t Au Eq over 1,033.5 meters including 1.112 g/t Au Eq over 532.5 meters;
 - Drill hole GS-21-113-W1: 4.07 g/t Au Eq over 78.0 meters within 1.30 g/t Au Eq over 459.0 meters;
 - Drill hole GS-20-83: 0.821 g/t Au Eq over 921 meters including 1.078 g/t Au Eq over 345 meters;
 - Drill hole GS-20-73: 0.932 g/t Au Eq over 775.5 meters including 1.502 g/t Au Eq over 229.5 metres;
 - Drill hole GS-19-42: 0.849 g/t Au Eq über 780 meters including 1.275 g/t Au Eq over 370.5 meters within the 300 horizon zone;
- ✓ Tudor Gold is a prime M&A acquisition target.
- ✓ **Strong support for the 'Tahltan First Nation':** Signed commitment and communication agreement.
- ✓ **Clear vote of confidence** - as of November 19, 2022, close to 47% of the shares were hold by **Tudor Holdings Ltd. (28.53%)** and resource investor **Eric Sprott (17.94%)**.

With speculative greetings,

Jörg Schulte

This promotional article was created on December 23, 2022 by Jörg Schulte, Managing Director of JS Research UG (limited liability). According to §84 WPHG, activities of JS Research UG (limited liability) ARE registered at BaFin! Sources: Tudor Gold, Stockcharts.com, Pixabay.com, Adobe, Twitter.com.

Disclaimer, risk information and exclusion of liability: We expressly point out that we accept no liability for the content of external links. Every investment in securities is fraught with risks. Due to political, economic or other changes, there can be considerable price losses. This applies in particular to investments in (foreign) small caps as well as in small and microcap companies; Due to the low market capitalization, investments in such securities are highly speculative and involve an extremely high risk, including the total loss of the invested capital. In addition, some of the stocks presented by JS Research UG (limited liability) are subject to currency risks. The background information, market assessments and securities analysis published by JS Research UG (limited liability) for the German-speaking area were prepared in compliance with the Austrian and German capital market regulations and are therefore intended exclusively for capital market participants in the Republic of Austria and the Federal Republic of Germany; other foreign capital market regulations were not taken into account and do not apply in any way. The publications by JS Research UG (limited liability) are for informational purposes only and expressly do not represent a financial analysis but are promotional texts of a purely advertising nature for the companies discussed, which typically pay a fee for this. There is no consulting contract between the reader and the authors or the publisher in existence by reading or subscribing the JS Research UG (limited liability) publications. All information and analysis do not constitute a solicitation, an offer or a recommendation to buy or sell investment instruments or for other transactions. Every investment in stocks, bonds, options or other financial products is subject to - in some cases considerable - risks. The publisher and authors of JS Research UG (limited liability) publications are not professional investment advisors!!! Therefore, it is essential that you always seek advice from a qualified specialist (e.g. your house bank or a qualified investment advisor you trust) when making investment decisions. All information and data published by JS Research UG (limited liability) come from sources which we consider to be reliable and

trustworthy at the time of preparation. However, no guarantee can be given with regard to the correctness and completeness of the information and data. The same applies to the evaluations and statements contained in the analysis and market assessments by JS Research UG (limited liability). These were created with the necessary care. Any responsibility or liability for the correctness and completeness of the information contained in this publication is excluded. All statements of opinion made reflect the current assessment of the author, which can change at any time without prior notice. No guarantee or liability is expressly assumed that the price or profit development forecasts by JS Research UG (limited liability) will materialize.

Information on conflicts of interest: The editors and responsible authors hereby declare that the following conflicts of interest with regard to the Tudor Gold company discussed in this publication exist at the time of publication: I. At the time of publication, the authors hold shares in Tudor Gold and reserve the right to retain them sell or take new positions in Tudor Gold at any time and without notice. The authors and the publisher cannot rule out that other stock market letters, media or research firms may discuss Tudor Gold shares during the same period. Therefore, symmetrical generation of information and opinions can occur during this period. This publication by JS Research UG (limited liability) is expressly not a financial analysis, but a publication of a very clear and clearly promotional character and thus to be understood as an advertising / marketing message. According to §34 WpHG I would like to point out that the author, editors, clients or brokers hold shares, options or warrants at the time of publication and can increase or sell these positions at any time! This clearly and specifically creates a conflict of interest.

We expressly point out a conflict of interest. This also applies to options and derivatives based on these securities. Any resulting transactions may, under certain circumstances, affect the company's share price. The information, recommendations, interviews and company presentations published on the "websites", the newsletter or the research reports are usually paid for by the respective companies or third parties (so-called "third parties"). The "third parties" include, for example, investor relations and public relations companies, brokers or investors. JS Research UG (limited liability) or its employees can partially be compensated directly or indirectly for the preparation, electronic distribution and other services by the discussed companies or so-called "third parties" with an expense allowance. Even if we prepare each report to the best of our knowledge and belief, we advise you to consult other external sources, such as your house bank or a trusted investment advisor, with regard to your investment decisions. For this reason, liability for financial losses that may result from using the information discussed here for one's own investment decisions is categorically excluded. Particularly in the case of commodities and exploration stocks and low capitalized stocks, the portfolio proportions of individual shares should only be so much that even in the event of a total loss, the total portfolio value can only lose marginal value. In particular, stocks with a low market capitalization (so-called "small caps") and especially exploration stocks as well as all listed securities in general are subject to considerable price volatility. The liquidity in the securities can be correspondingly low. When investing in the commodity sector (exploration companies, raw material producers, companies developing raw material projects), additional risks must be taken into account. Below are some examples of specific risks in the commodity sector:

Country risks, currency fluctuations, natural disasters and storms (e.g. floods, storms), changes in the legal situation (e.g. export and import bans, punitive tariffs, prohibition of raw material extraction or raw material exploration, nationalization of projects), environmental requirements (e.g. higher costs for environmental protection, designation of new environmental protection areas, prohibition of various mining methods), fluctuations in raw material prices and considerable exploration risks.

Disclaimer: All information published in the report is based on careful research. The information does not represent an offer to sell the shares discussed, nor an invitation to buy or sell securities. This report only reflects the personal opinion of Joerg Schulte and is in no way to be equated with a financial analysis. Before making any investments, professional advice from your bank is essential. The statements are based on sources that the publisher and his staff consider to be trustworthy. Nevertheless, no liability can be assumed for the correctness of the content. No guarantee is given for the accuracy of the charts and data on the commodity, currency and stock markets shown. The source language (usually English) in which the original text is published is the official, authorized and legally valid version. This translation is included for better understanding. The German version can be shortened or summarized. No responsibility or liability is assumed for the content, correctness, appropriateness or accuracy of this translation. From the perspective of the translator, the message does not constitute a buy or sell recommendation! Read here - <https://www.js-research.de/disclaimer-agb/> -. Please also note the original English message, if available. It may happen that we use third party providers for the electronic distribution of news and content about our customers / our featured companies. However, we have no control over the content of the information published by our featured companies and / or third-party providers, and we do not review them. These third-party vendors are likely to be compensated for providing positive information about the companies, even if they do not disclose it.
