**Tudor Gold published the first drill results of the season...  
Extremely High-Grade intercepts with up to 70,96 g/t Gold Eq (visible gold)!**

**The stock reacted nicely with a price increase of 53% within 9 days!**

Things are happening in quick succession here: In the last two weeks, the company published three press releases with results from the 2022 exploration program. The first drilling results were very impressive and the stock price performed well!

**Introduction:**

**First spectacular drill results from this year drill season released: Visible gold was encountered with up to 70.96 g/t Gold Eq.**

**+++**

**Several step-out drill holes (up to 500 meters away from the 2021 exploration season) hit all gold mineralization. This should have an extremely positive impact on the next resource estimate!**

**+++**

**This world-class exploration company controls a significant gold resource of 27.3 million ounces Gold Eq across all categories!**

**+++**

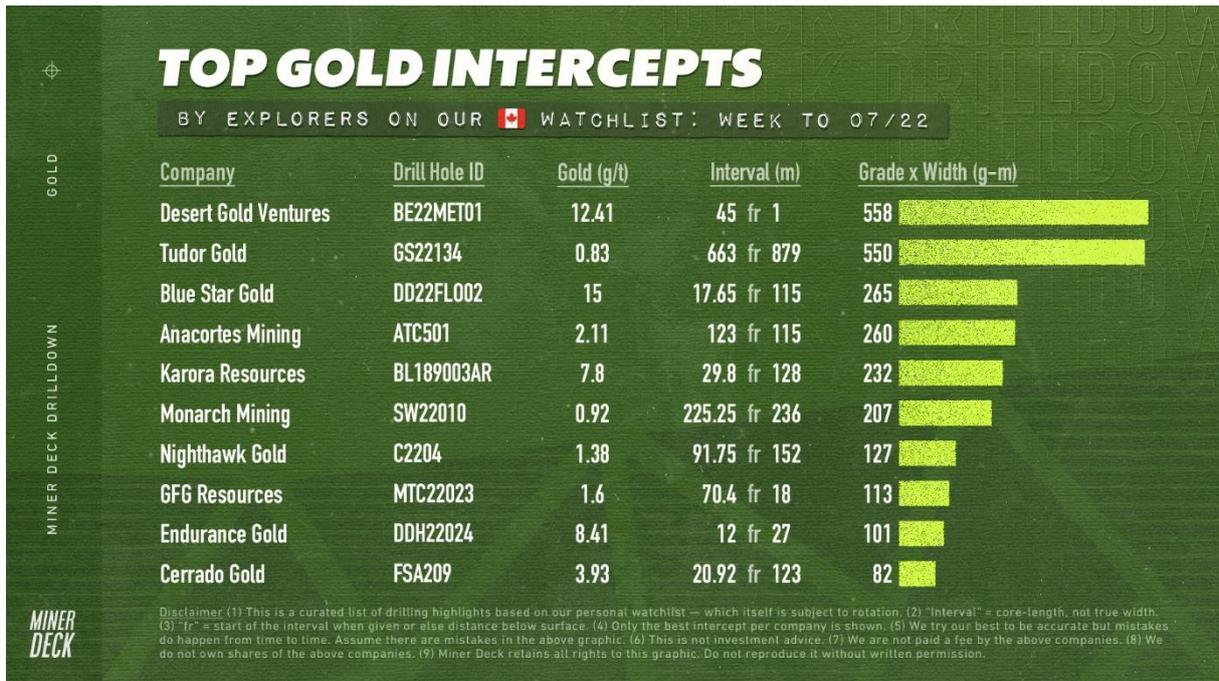

**Dear Readers!**

**Exceptional drill results are the lifeblood and rocket fuel for rising share prices for exploration & mining companies.**

**Such an example can be seen very nicely in the explosive price development of the top-notch gold company **Tudor Gold Corp. (Ticker: TUD)**.**

**The company was able to publish three strong press releases within just 2 weeks – and the share price gained more than **+50 %**.**

**Many of the published drill results over the last few years have been so excellent, that they have achieved high rankings in the world's best gold intervals! (see table below)**

Source: <https://twitter.com/MinerDeck/status/1550488386410106880>

This also underscores the world-class status of the 'Treaty Creek' project with its existing initial mineral resource estimate of 27.3 million ounces of Gold Eq across all categories.

In addition, there are several additional high-potential drill targets on the 17,913-hectare flagship project including 'Eureka' / 'Calm before the Storm (CBS)' or 'Perfectstorm (PSZ)'.

The tough consolidation phase led to a **53 %** price increase!

The next chart technical price levels to the upside are **CAD 2.50** and thereafter the all-time highs at **CAD 4.51**. Smart investors can look forward to possible price gains of over **150 %**!

Source: Stockcharts.com

[Let's now take a closer look at the highlights of the first three drill results released from this year's exploration program:](#)

[News release as of July 12, 2022 \(link here\):](#)

**Tudor Gold (Ticker: TUD)** released results from **5 diamond drill holes**, all of which encountered gold/silver and copper mineralization.

Step-out drill hole **GS-22-133** contained sensational intercepts such as:

- **1.51 g/t Gold Eq over 237.3 meters** that was within an intercept of **600 meters of 0.91 g/t Gold Eq**.

[Ken Konkin, President and CEO of Tudor Gold, comments:](#)

*„We are extremely pleased with the first set of results of our 2022 Goldstorm resource expansion drill program. We continue to encounter strong gold, silver and copper mineralization **outside the previously defined resource area**.*

*Additionally, we have confirmed the **discovery of a new zone** in the southern portion of ‚Goldstorm‘ which adds yet another dimension to this expanding deposit. Based on an intercept obtained in 2020 from GS-20-66 which was formerly believed to be part of the CS600 Domain (**2.15 g/t AUEQ over 75.0 m**), the 100 m step-out hole **GS-22-135** intercepted an up-dip expression of **1.42 g/t AUEQ over 55.5 m**. This has been named **Route 66 (R-66)**. This is clearly a gold-dominant system that exists separate to the known CS600 and DS5 Domains.”*

[News release as of July 19, 2022 \(link here\):](#)

Tudor published further results just a few days ago from **8 diamond drill holes**, all of which also encountered gold/silver and copper mineralization. 4 drill holes were drilled at the ‘Goldstorm Target’ and 4 drill holes at ‘Calm Before the Storm’. Seven out of eight drill holes were targeted outside the area of the 2021 mineral resource estimate.

Of note is step-out hole **GS-22-134**, which intersected **20.86 g/t Gold Eq over 4.50 meters**, within an intercept of **25.5 meters of 9.96 g/t Gold Eq**. This step-out hole high high grade intercepts is located **500 meters** northeast from the 2021 exploration program at the Goldstorm deposit.

**Ken Konkin, President and CEO of Tudor Gold, comments:**

*„Step-out drilling that has expanded the area of this domain includes **GS-22-137** which contained **1.44 g/t AuEQ over 232.5 m, with an enriched zone of 2.03 g/t AuEQ over 60.0 m.***

*The Goldstorm deposit remains open in all directions and at depth. Drilling at our newly discovered CBS system provided positive results with numerous at surface intercepts that ranged between **1.00 g/t AuEQ to 1.53 g/t AuEQ over 7.5 m to 9.4 m, with a deeper intercept that grades 0.77 g/t AuEQ over 79.5 m.***

*Continued drilling is recommended for the ‚CBS Zone‘, however, for the remainder of this season all drills will continue drilling at Goldstorm, as the extent of this deposit continues to expand with extremely positive results. We have stepped out approximately half a kilometer with outstanding and consistent results and we will continue to drill step-out holes for 2022.”*

**News release as of July 26, 2022 ([link here](#)) with results from step-out drill hole GS-22-143:**

This drill hole is located 225 meters northeast of the 2021 drill program. Tudor Gold intersected a stunning **70.96 g/t Gold Eq over 1.00 meter** within an intercept of **2.0 meter with 39.15 g/t Gold Eq.**

**Ken Konkin, President and CEO of Tudor Gold, comments:**

*„The unique aspect of the two-meter composite of 39.15 g/t AuEQ and the 4.5 meter visible gold composite from GS-22-134 that averaged 20.86 g/t AuEQ is that they both appear to have similar modes of occurrence that resembles the gold mineralization at the Valley of Kings (VOK) Deposit at Newcrest’s Brucejack Lake Mine adjacent to our southern border.*

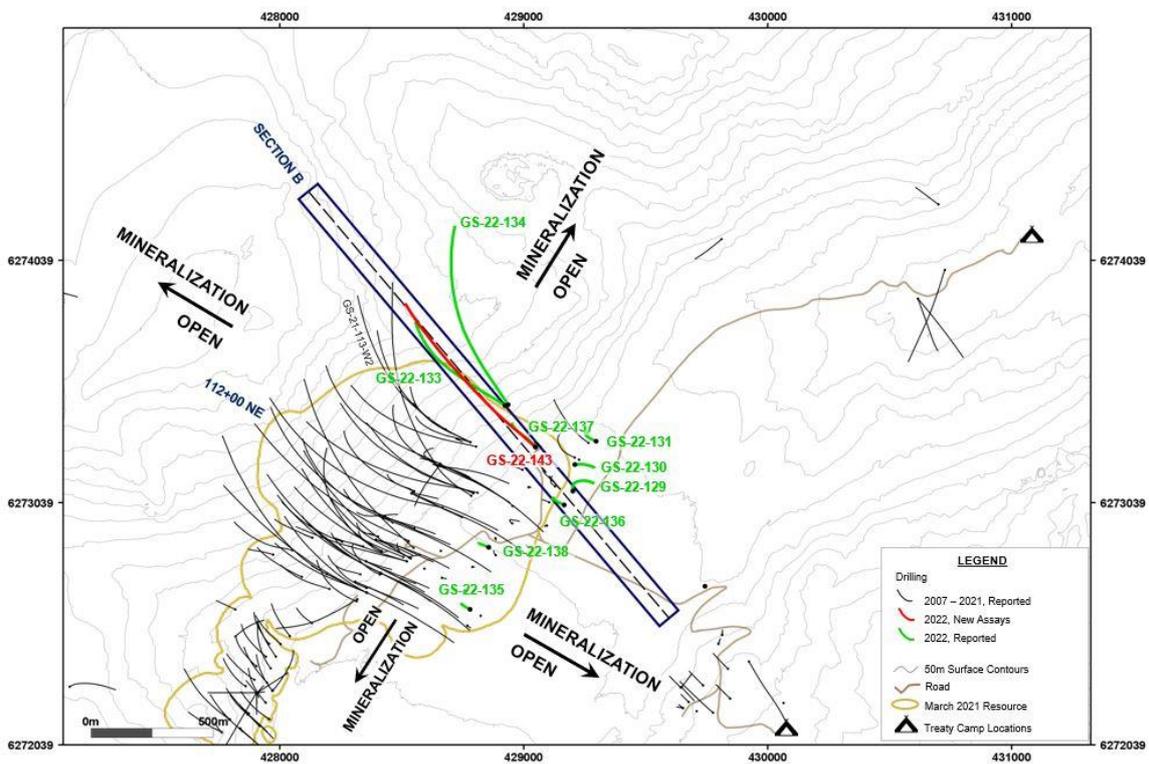

*As with the discovery of R-66 to the southeast, these new high-grade gold intercepts may be completely different pulses of mineralization that can occur outside the known limits of the porphyry style of gold mineralization.”*

On the graphic below you can clearly see the initial resource of the Goldstorm deposit (yellow framed zone) as well as various step-out holes (up to 500 meters away from the 2021 drill program).

Source: Tudor Gold Corp.

By the way, the results of the 2021 and 2022 drilling season should have a significant impact on the next resource estimate!

**Various Reasons speak for an investment**  
**into Tudor Gold:**

- ✓ On Tudor Gold's world-class Treaty Creek project has been already a huge resource of **27.3 million ounces of Gold Eq** (CB/Goldstorm) in all categories delineated. There remains tremendous potential for expansion with additional high prospect drill targets on the property e.g., 'Eureka' and 'Calm Before the Storm (CBS)'.
- ✓ **Extremely attractive stock valuation:** an ounce of gold is currently valued at less than \$20 per ounce of gold Eq. In the past, between 50 and 80 USD were often put on the table for M&A transactions.
- ✓ **Additional "bonus":** the annual general and special meeting will take place on September 7, 2022. The 'Spin-out of the Crown project' should be also be voted on here. It is expected, that Tudor shareholders will receive bonus shares of Goldstorm Metals Corp. (approximately 0.251 common shares of Goldstorm Metals for each owned Tudor share.
- ✓ The 2021 & 2022 exploration program already confirmed, ore grades are SIGNIFICANTLY higher in step-out drill holes towards the north/northeast direction of the Goldstorm deposit. Drill results from 2021 and 2022 will be incorporated into a new resource estimate.
- ✓ Further results from the 2022 exploration program are expected to be released Q4 2022.

**TUDOR GOLD**

(WKN: A2AJ7Y, Frankfurt: TUC, TSX-V: TUD)

**For all new readers, we have briefly put together some background information on Tudor Gold:**

**Tudor Gold** is a precious and base metal exploration company with properties in the 'Golden Triangle' of British Columbia, an area of producing or past producing mines and several large deposits near potential development. The 17,913-hectare Treaty Creek project (in which Tudor Gold has a 60% interest) is bordered to the southwest by Seabridge Gold Inc.'s KSM property and to the southeast to Newcrest's (former Pretium Resources) 'Brucejack property'. The company controls 100% of the 'Crown' project. In addition, Tudor has 'earn-in' options and is 100% involved in other projects in the 'Golden Triangle'.

From the southwest corner of the Treaty Creek claims bordering Seabridge Gold's concession areas, the Sulphurets Thrust Fault leads from the Seabridge Iron Cap deposit to the Tudor Gold Goldstorm system. **The 'Goldstorm' zone is located five kilometers northeast of Seabridge's 'Iron Cap' deposit.**

## A District of Giant Reserves and Resources

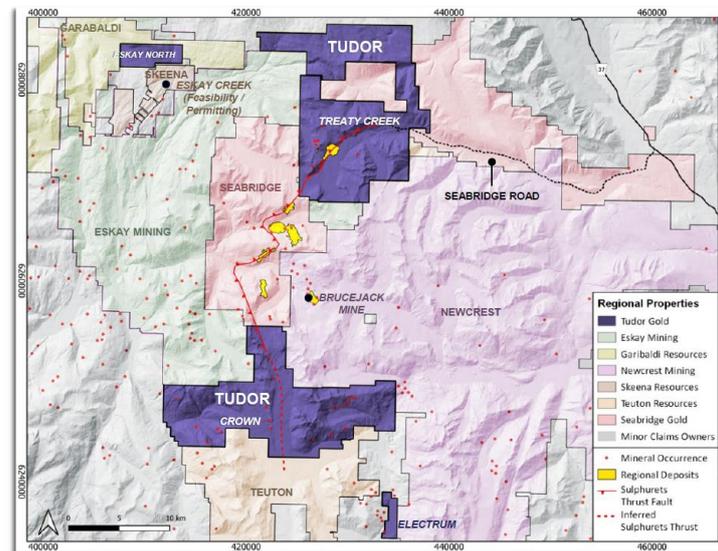

Tudor Gold's properties are strategically positioned next to some of the largest undeveloped and producing gold & copper resources in the world:

Seabridge's deposits contain reported Resources (M&I) totaling over 76.4 Million oz Gold & 17.6 Billion lbs Copper.

**Goldstorm/Copper Belle Deposit** contributes to Resources in the Sulphurets Mineral District; (M&I) 19.4 Million oz Gold Eq.

**Crown Property:** proposed spin-out into Goldstorm Metals Corp in the spring of this year.

**Eskay North Property** adjacent to Skeena's Eskay Creek.

## Top Facts & Highlights about Tudor Gold Corp:

- ✓ Initial resource estimate published on Treaty Creek in March 2021: 27.3 million ounces of Gold Eq (of which 19.4 million ounces at 0.74 g/t Gold Eq in the Measured and Indicated resource category)
- ✓ Enormous exploration potential – most parts of the exploration projects are still largely unexplored. There are several high potential exploration targets on Treaty Creek (e.g. 'Perfect Storm' / 'Eureka' / 'Calm before the Storm').
- ✓ The company plans to spin-out the 'Crown' project in the next few months: Shareholders should get for every 1 Tudor in ownership approx. 0.251 in the new established Goldstorm Metals Corp. ([See link to the news release here](#))

- ✓ **Prime location:** huge land package in the famous Canadian 'Golden Triangle' region - more than **145 million ounces of gold and 50 billion Pounds of copper have already been discovered within a few kilometers to Treaty Creek.**
- ✓ The flagship project 'Treaty Creek' is right next to the largest world-class deposits and mines. (Seabridge Gold and Newcrest Mining)
- ✓ Extremely promising project portfolio with over **35,518 hectares** of concession areas, spread over three projects.
- ✓ Treaty Creek' is close to good infrastructure: **the nearest road and power line are only around 25 km away.**
- ✓ There is running water all year round on Treaty Creek - this is an important requirement for future mining operations.
- ✓ Excellent geological location of the acquired land packages in mining-friendly British Columbia, Canada.
- ✓ **Top Management** - Very experienced and successful team led by the award-winning geologist **Ken Konkin**, who was appointed as President & CEO on December 21, 2021. He was instrumental in the discovery of Pretium Resources 'The Valley of Kings' deposit (now Newcrest).
- ✓ Founder of Tudor Gold is the renowned **Walter Storm**, who was also Co-founder of the Canadian mining company Osisko Mining. Mr. Storm was the Chairman of Tudor Gold until his death in June 2022.

✓ **World-class drill results at flagship project ,Treaty Creek': e.g.**

- **Drill hole GS-22-134: 20.86 g/t Au Eq over 4.50 meters within an intercept of 25.5 meters of 9.96 g/t Au Eq;**
- **Drill hole GS-22-143: 70.96 g/t Au Eq over 1.00 meter within an intercept of 2.00 meters of 39.15 g/t Au Eq;**
- **Drill hole GS-21-113-W2: 0.97 g/t Au Eq over 1,320 meters including 1.38 g/t Au Eq over 556,5 meters;**
- **Drill hole GS-20-65: 1.161 g/t AuEq over 930 meters including 2.12 g/t Au Eq over 348 meters;**
- **Drill hole GS-20-92: 0.999 g/t Au Eq over 531 meters including 3.286 g/t Au Eq over 82.5 meters;**
- **Drill hole GS-20-91: 0.856 g/t Au Eq over 1,033.5 meters including 1.112 g/t Au Eq over 532.5 meters;**
- **Drill hole GS-21-113-W1: 4.07 g/t Au Eq over 78.0 meters within 1.30 g/t Au Eq over 459.0 meters;**
- **Drill hole GS-20-83: 0.821 g/t Au Eq over 921 meters including 1.078 g/t Au Eq over 345 meters;**
- **Drill hole GS-20-73: 0.932 g/t Au Eq over 775.5 meters including 1.502 g/t Au Eq over 229.5 metres;**
- **Drill hole GS-19-42: 0.849 g/t Au Eq über 780 meters including 1.275 g/t Au Eq over 370.5 meters within the 300 horizon zone;**

- ✓ Tudor Gold is a prime M&A acquisition target.
- ✓ **Strong support for the 'Tahltan First Nation'**: Signing of a commitment and communication agreement.
- ✓ **Clear vote of confidence** - as of June 20, 2022, close to 47% of the shares were held by **Tudor Holdings Ltd. (29.27%)** and resource investor **Eric Sprott (17.61%)**.

With speculative greetings,

Jörg Schulte

This promotional article was created on July 27, 2022 by Jörg Schulte, Managing Director of JS Research UG (limited liability). According to §84 WPHG, activities of JS Research UG (limited liability) ARE registered at BaFin! Sources: Tudor Gold, Stockcharts.com, Pixabay.com, Twitter.com.

**Disclaimer, risk information and exclusion of liability:** We expressly point out that we accept no liability for the content of external links. Every investment in securities is fraught with risks. Due to political, economic or other changes, there can be considerable price losses. This applies in particular to investments in (foreign) small caps as well as in small and microcap companies; Due to the low market capitalization, investments in such securities are highly speculative and involve an extremely high risk, including the total loss of the invested capital. In addition, some of the stocks presented by JS Research UG (limited liability) are subject to currency risks. The background information, market assessments and securities analysis published by JS Research UG (limited liability) for the German-speaking area were prepared in compliance with the Austrian and German capital market regulations and are therefore intended exclusively for capital market participants in the Republic of Austria and the Federal Republic of Germany; other foreign capital market regulations were not taken into account and do not apply in any way. The publications by JS Research UG (limited liability) are for informational purposes only and expressly do not represent a financial analysis but are

promotional texts of a purely advertising nature for the companies discussed, which typically pay a fee for this. There is no consulting contract between the reader and the authors or the publisher in existence by reading or subscribing the JS Research UG (limited liability) publications. All information and analysis do not constitute a solicitation, an offer or a recommendation to buy or sell investment instruments or for other transactions. Every investment in stocks, bonds, options or other financial products is subject to - in some cases considerable - risks. The publisher and authors of JS Research UG (limited liability) publications are not professional investment advisors!!! Therefore, it is essential that you always seek advice from a qualified specialist (e.g. your house bank or a qualified investment advisor you trust) when making investment decisions. All information and data published by JS Research UG (limited liability) come from sources which we consider to be reliable and trustworthy at the time of preparation. However, no guarantee can be given with regard to the correctness and completeness of the information and data. The same applies to the evaluations and statements contained in the analysis and market assessments by JS Research UG (limited liability). These were created with the necessary care. Any responsibility or liability for the correctness and completeness of the information contained in this publication is excluded. All statements of opinion made reflect the current assessment of the author, which can change at any time without prior notice. No guarantee or liability is expressly assumed that the price or profit development forecasts by JS Research UG (limited liability) will materialize.

**Information on conflicts of interest:** The editors and responsible authors hereby declare that the following conflicts of interest with regard to the Tudor Gold company discussed in this publication exist at the time of publication: I. At the time of publication, the authors hold shares in Tudor Gold and reserve the right to retain them sell or take new positions in Tudor Gold at any time and without notice. The authors and the publisher cannot rule out that other stock market letters, media or research firms may discuss Tudor Gold shares during the same period. Therefore, symmetrical generation of information and opinions can occur during this period. This publication by JS Research UG (limited liability) is expressly not a financial analysis, but a publication of a very clear and clearly promotional character and thus to be understood as an advertising / marketing message. According to §34 WpHG I would like to point out that the author, editors, clients or brokers hold shares, options or warrants at the time of publication and can increase or sell these positions at any time! This clearly and specifically creates a conflict of interest.

We expressly point out a conflict of interest. This also applies to options and derivatives based on these securities. Any resulting transactions may, under certain circumstances, affect the company's share price. The information, recommendations, interviews and company presentations published on the "websites", the newsletter or the research reports are usually paid for by the respective companies or third parties (so-called "third parties"). The "third parties" include, for example, investor relations and public relations companies, brokers or investors. JS Research UG (limited liability) or its employees can partially be compensated directly or indirectly for the preparation, electronic distribution and other services by the discussed companies or so-called "third parties" with an expense allowance. Even if we prepare each report to the best of our knowledge and belief, we advise you to consult other external sources, such as your house bank or a trusted investment advisor, with regard to your investment decisions. For this reason, liability for financial losses that may result from using

the information discussed here for one's own investment decisions is categorically excluded. Particularly in the case of commodities and exploration stocks and low capitalized stocks, the portfolio proportions of individual shares should only be so much that even in the event of a total loss, the total portfolio value can only lose marginal value. In particular, stocks with a low market capitalization (so-called "small caps") and especially exploration stocks as well as all listed securities in general are subject to considerable price volatility. The liquidity in the securities can be correspondingly low. When investing in the commodity sector (exploration companies, raw material producers, companies developing raw material projects), additional risks must be taken into account. Below are some examples of specific risks in the commodity sector: Country risks, currency fluctuations, natural disasters and storms (e.g. floods, storms), changes in the legal situation (e.g. export and import bans, punitive tariffs, prohibition of raw material extraction or raw material exploration, nationalization of projects), environmental requirements (e.g. higher costs for environmental protection, designation of new environmental protection areas, prohibition of various mining methods), fluctuations in raw material prices and considerable exploration risks.

**Disclaimer:** All information published in the report is based on careful research. The information does not represent an offer to sell the shares discussed, nor an invitation to buy or sell securities. This report only reflects the personal opinion of Joerg Schulte and is in no way to be equated with a financial analysis. Before making any investments, professional advice from your bank is essential. The statements are based on sources that the publisher and his staff consider to be trustworthy. Nevertheless, no liability can be assumed for the correctness of the content. No guarantee is given for the accuracy of the charts and data on the commodity, currency and stock markets shown. The source language (usually English) in which the original text is published is the official, authorized and legally valid version. This translation is included for better understanding. The German version can be shortened or summarized. No responsibility or liability is assumed for the content, correctness, appropriateness or accuracy of this translation. From the perspective of the translator, the message does not constitute a buy or sell recommendation! Read here - <https://www.js-research.de/disclaimer-agb/> -. Please also note the original English message, if available. It may happen that we use third party providers for the electronic distribution of news and content about our customers / our featured companies. However, we have no control over the content of the information published by our featured companies and / or third-party providers, and we do not review them.
